

National Interagency Coordination Center
Incident Management Situation Report
Wednesday, August 27, 2014 – 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (93 new fires)
New large fires:	0 (*)
Large fires contained:	2
Uncontained large fires: **	14
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires:	13
New large fires:	0
Uncontained large fires:	9
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

July Complex (2 fires), Klamath NF. IMT 1 (Opliger). Four miles east of Sawyers Bar, CA. Timber. Active fire behavior with torching. Numerous structures threatened. Evacuations, road and area closures in effect.

Happy Camp Complex (3 fires), Klamath NF. IMT 1 (Pincha-Tulley) and IMT 2 (Wakoski). One mile east of Happy Camp, CA. Timber, brush and grass. Moderate fire behavior with isolated torching. Numerous structures threatened.

Oregon, Shasta-Trinity Unit, Cal Fire. Three miles northwest of Weaverville, CA. Brush and grass. Minimal fire behavior.

KNF Beaver, Klamath NF. Started on private land 16 miles northwest of Yreka, CA. Timber, brush and grass. Interior burning. Road and area closures in effect.

Log, Klamath NF. Six miles west of Greenview, CA. Timber. Creeping and smoldering.

Lodge Complex, Mendocino Unit, Cal Fire. Twelve miles northwest of Laytonville, CA. Timber and chaparral. Interior burning. Last report unless significant activity occurs.

Predictive Services Discussion: As high pressure strengthens over California and moves into the Pacific Northwest, conditions will be warming and drying, including portions of the southwest U.S. and the western Great Basin. The central Rockies and high Plains will continue to see heavy showers and thunderstorms in response to an upper level low pressure system moving east through the region. Storms will also extend along a cold front stretching from the upper Mid-West through New England. South of that frontal boundary, it will remain hot and humid under a ridge of high pressure centered over the southern Plains.

POWERLINE SAFETY

Miscellaneous Fireline Hazards

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential equipment damage or injury:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Keep all aviation activity away from power lines. Inform air attack and/or other aviation resources of the location of the power lines.
- Don't drive with long antennas under power lines.
- Don't stand near power lines during retardant drops.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Don't apply straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near, jump clear, don't hang on, keep feet together, and bunny hop away.
