

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Thursday, August 28, 2014 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (104 new fires)
New large fires:	0 (*)
Large fires contained:	0
Uncontained large fires: **	13
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Northern California Area (PL 3)**

New fires:	13
New large fires:	0
Uncontained large fires:	8
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

**July Complex** (2 fires), Klamath NF. IMT 1 (Opliger). Four miles east of Sawyers Bar, CA. Timber. Moderate fire behavior with torching. Numerous structures threatened. Evacuations, road and area closures in effect.

**Happy Camp Complex** (3 fires), Klamath NF. IMT 1 (Pincha-Tulley) and IMT 2 (Wakoski). One mile east of Happy Camp, CA. Timber, brush and grass. Moderate fire behavior with short crown runs. Numerous structures threatened.

**Oregon**, Shasta-Trinity Unit, Cal Fire. Three miles northwest of Weaverville, CA. Brush and grass. Minimal fire behavior.

**KNF Beaver**, Klamath NF. Started on private land 16 miles northwest of Yreka, CA. Timber, brush and grass. Interior burning. Road and area closures in effect.

**Log**, Klamath NF. Six miles west of Greenview, CA. Timber. Creeping and smoldering.

Total	19	51,373	2	2	1	161

**Predictive Services Discussion:** Isolated showers and thunderstorms will develop from eastern Washington through central Montana as a weak upper level disturbance flattens out a ridge of high pressure. Locally breezy winds are also possible. Otherwise, warming and drying are expected for much of the western U.S., including California, the Desert Southwest and the Great Basin. A strong upper level low pressure system and associated cold front will be the focus for showers and thunderstorms extending from the southern Plains northeastward through the Great Lakes Region. There is also a chance of storms along the Gulf Coast, while temperatures in the southeast U.S. remain hot.

## EXTENDED ATTACK

*Operational Engagement Category*

After your initial size-up of the fire and/or transfer of command from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the other forces associated with the fire?
- Can you control the fire with the resources available (either on the incident or soon to be on the incident) under expected conditions?
- Have you developed a plan to attack the fire?
  - Direct or indirect
  - Anchor points
  - Escape routes
  - Head or flank attack
  - Priority areas
- Have you communicated this to all personnel assigned to the incident, including new arrivals?
- Can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
  - If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of what resources have been ordered for the fire?
