

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Saturday, August 30, 2014 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (85 new fires)
New large fires:	1 (*)
Large fires contained:	1
Uncontained large fires: **	11
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	4

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Northern California Area (PL 3)**

New fires:	12
New large fires:	0
Uncontained large fires:	6
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

**July Complex** (2 fires), Klamath NF. IMT 1 (Opliger). Four miles east of Sawyers Bar, CA. Timber. Moderate fire behavior with torching and short-range spotting. Structures threatened. Evacuations, road and area closures in effect.

**Happy Camp Complex** (3 fires), Klamath NF. IMT 1 (Pincha-Tulley) and IMT 2 (Wakoski). One mile east of Happy Camp, CA. Timber, brush and grass. Active fire behavior with isolated torching, short crown runs and short-range spotting. Numerous structures threatened. Evacuations and area closures in effect.

**KNF Beaver**, Klamath NF. Started on private land 16 miles northwest of Yreka, CA. Timber, brush and grass. Interior burning. Road and area closures in effect.

### Northwest Area (PL 3)

New fires:	8
New large fires:	1
Uncontained large fires:	5
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

\* **Lost Hubcap**, John Day Unit, Oregon DOF. IMT 2 (Cline). Eight miles southwest of Monument, OR. Timber, brush and grass. Active fire behavior with torching. Structures threatened.

**Deception Complex** (2 fires), Willamette NF. Transfer of command from IMT 2 (Watts) to IMT 1 (Schulte) will occur tomorrow. Two miles west of Oakridge, OR. Timber. Moderate fire behavior. Structures threatened. Area closures in effect.

**790**, Rogue River-Siskiyou NF. IMT 2 (Fillis). Thirty miles northeast of Medford, OR. Timber. Moderate fire behavior with isolated torching and short crown runs.

**Somers**, Wallowa-Whitman NF. Fifteen miles east of Imnaha, OR. Timber and grass. Interior creeping and smoldering. Structures threatened. Last report unless significant activity occurs.

**South Fork Complex**, Prineville District, BLM. Twenty miles southwest of John Day, OR. Timber, brush and grass. Creeping and smoldering with occasional torching. Area closures in effect.

**Predictive Services Discussion:** A cold front will move east through the Great Basin and northern Rockies with breezy to windy conditions and isolated showers and thunderstorms. Most of the western half of the U.S. will see breezy to windy conditions as an upper level trough of low pressure becomes the dominant feature. While cooler conditions are expected for the northwest part of the U.S., warm, breezy and dry weather will develop over the western Great Basin and Southwest. Shower and thunderstorm activity will be widespread east of the Rockies, stretching from the Gulf coast northeastward through the Great Lakes region, where an upper level disturbance is tapping very moist conditions.

## Nomex

*Miscellaneous Category*

Nomex is the brand name for a **heat and flame-resistant** textile made by the DuPont chemical company and first marketed in 1967. Today, more than three million firefighters and aviation personnel around the world are protected by structure fire turnout gear, wildland fire PPE, and flight suits and jackets made of Nomex.

Nomex IS NOT flame-proof. It burns when you hold a flame to it, but stops burning once the heat source is removed. The thick woven structure of synthetic fibers is a very poor conductor of heat. When exposed to heat, the fibers expand closing the spaces between them insulating the wearer. But to work correctly, Nomex needs care.

### Dirty Nomex

- Wash Nomex like normal laundry, but always include a rinse cycle that adequately removes soaps and detergents.
- Nomex garments should never be subjected to strong oxidizing agents such as peroxides or bleaches. These harm the physical strength of the fabric.
- Tumble-dry and remove while slightly damp. Over-drying damages the fabric.

**Poison Oak/Ivy/Sumac on Nomex** - MTDC researched the laundering of Nomex firefighting clothing that has been contaminated with urushiol oil (what causes the rash) from poison oak/ivy/sumac exposure.

- MTDC recommends that fire clothing contaminated with urushiol oil be cleaned following normal Nomex laundering procedures, with a degreaser such as a detergent or laundry soap, and as soon as possible.
- Extra care should be exercised when handling the contaminated clothing and should be kept separate from unaffected clothing and equipment.
- Put the affected clothing in a marked bag if you are giving it to someone else to wash.

Before handling the affected clothing, apply a skin-barrier product such as Ivy Block or Technu.

**Fuel Soaked Nomex** - Flammable contaminants will reduce the thermal performance of any flame-resistant garment including Nomex.

- Proper and periodic cleaning is essential to maintain thermal protective performance.

**Action Item - Nomex is not effective if it is excessively dirty, fuel-soaked, or has holes. Does your Nomex need to be washed, repaired or replaced?**
