**Incident Management Situation Report**  
**Friday, December 12, 2014 – 0800 MT**  
**National Preparedness Level 1**

**National Fire Activity (Weekly Total)**

Initial attack activity:	Light (125 new fires)
New large fires:	4 (*)
Large fires contained:	3
Uncontained large fires: **	0
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Predictive Services Discussion:** Very heavy precipitation and strong winds will continue for portions of the Intermountain West through the weekend, especially the Pacific Coastal regions of California. Unsettled conditions will also continue for much of New England this weekend with a low pressure system that will gradually move east toward the Atlantic. Although the storm track will continue to be active west of the Rockies through next week, the focus will turn to the Four-Corners region and Rocky Mountains where an upper level disturbance will intensify before spreading widespread winter weather through the High Plains.

## IN COUNTRY NOT SEEN IN DAYLIGHT

*Operational Engagement Category*

Often firefighters arrive on a fire after dark. This is recognized as Watchout Situation #2. Before safely fighting fire in country not seen in daylight, firefighters must be able to answer the following questions:

- Can the resources you are replacing give you a thorough briefing? Identify whom you might get information from. Can you meet up with the departing overhead/resource leaders?
- Can you observe the area/use scouts? List ways you could observe the area you need to work.
- Have escape routes and safety zones been thoroughly scouted and marked for night use? Talk about what constitutes an escape route and a safety zone; who would identify them; and in what ways might they be marked.
- Have potential dangers been located; can they be mitigated? What are the dangers associated with Watchout Situation #2? How can they be worked around?
- Reduce the risks by:
  - Posting lookouts.
  - Checking communications.
  - Retreat if you have doubts about your escape routes or safety zones or the situation becomes too complex. Give examples of arriving on a fire after dark and what was done to allow you to fight fire safely in country not seen in daylight.
  - Identifying prominent geographic features
