

National Interagency Coordination Center
Incident Management Situation Report
Tuesday July 1, 2014 – 0530 MT
National Preparedness Level 1

National Fire Activity

Initial attack activity:	Light (108 new fires)
New large fires:	4 (*)
Large fires contained:	5
Uncontained large fires: **	4
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	3

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: A ridge of high pressure over the western U.S. will intensify today with hot and dry conditions as well as the threat of isolated thunderstorms from the Oregon Cascades through the Sierra Mountains. A tap of monsoonal moisture will move northward through the southern Plains, Southwest U.S. and central Rockies with a mixed bag of wet and dry thunderstorms. A broad upper level trough of low pressure will bring showers and thunderstorms to the upper Midwest and Great Lakes regions, while a tropical disturbance will deliver thunderstorms to Florida before moving northward along the Atlantic coast. Alaska will continue to see showers.

A Week to Remember, Reflect and Learn
June 30 - July 6, 2014

How can we learn from the past?

6 Minutes FOR SAFETY

Wildland Fire Lessons Learned Center
Established 2002

Accident Reports – Go Read Some *by Travis Dotson, Wildland Fire Lessons Learned Center*

Why Read a Report? The whole idea of reading a report is to put yourself in the shoes of the decision makers and gain some insight and operational “slides” to deposit in your bank of experience. Right? OK, so this may not be the case for everyone. But the majority of the reports are written with the idea that someone will learn from knowing the details of the event. Does that happen? Are we learning?

I came up in a fire culture that taught me to read incident reports and then sit around saying: “What were they thinking?” “They screwed up,” and “I would never get caught in that situation.” Did I learn anything from those “not me” sessions? Or, did I just convince myself that I was not in any danger because “I know better”? Monday morning quarterback perhaps? (The academic term is “[hindsight bias](#).” Look it up.)

So the question remains: Why read a report? How do we learn from it? In this instance, learning consists of changing your behavior. Read a report, go to a fire, operate differently because you read a report. Is that real? I don’t know. But I think it’s possible.

Think About It! I’ve read a lot of “Hit by Tree” reports. I’m terrified of getting smashed by a tree (or someone else getting smashed on my watch). But has my behavior changed? It never did until I consciously said to myself: “This could be me. What am I going to do differently?”

I now put much more thought into the exposure involved in what I ask others to do. Do I hold myself to that same standard? I do when I inquire of myself: “Would I ask someone else to do this?” I didn’t always think this way.

I’m still not “out of the woods” (HA!) on this one. I still might get smashed by a tree, but I’d like to think I will expose myself and others to that potential a whole lot less—and mitigate what I can when I am exposed. Think about it!

So, read some of these reports. Be aware of the existence of hindsight bias. Consciously think about whether or not you are learning anything (will you change behavior?). I’m just throwing it out there. Dig on tool swingers (and look up every now and then).

This article was originally published by the Wildland Fire Lessons Learned Center 2011 Summer edition of Two More Chains. All editions of this publication can be found at: <http://www.wildfirelessons.net/resources/twomorechains>

Additional Learning:

- **Here they are...incident reports. Go read some:** <http://www.wildfirelessons.net/irdb>
- **Video: “Battles Lost”** This is a NWCG video describing our fatality fire history, and our hard lessons learned.
- **Video Collection: Learning from Incidents** including case studies, interviews and much more...
- **Wildland Fire Leadership Staff Ride Library** The intent of a staff ride is to put participants in the shoes of the decision makers on a historical incident in order to learn for the future and is NOT a tactical-fault finding exercise. Participants should be challenged to push past the basic question of “What happened?” and examine the deeper questions of leadership and decision-making: “What would I have done in this person’s place?”
