

National Interagency Coordination Center
Incident Management Situation Report
Saturday July 5, 2014 – 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (139 new fires)
New large fires:	2 (*)
Large fires contained:	2
Uncontained large fires: **	17
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires:	23
New large fires:	1
Uncontained large fires:	4
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Butts, Sonoma-Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Smith). Three miles north of Pope Valley, CA. Brush and grass. Numerous residences threatened. No further information received.

Modoc July Complex, Modoc NF. IMT 2 (Johnson). IMT also managing the Gulch fire. Twenty miles southeast of Newell, CA. Mixed conifer, brush and grass. Creeping and smoldering.

Coleman, Northern California District, BLM. IMT 2 (Minton). Twenty-five miles east of Fort Bidwell, CA. Juniper, brush and grass. Active fire behavior with isolated torching and short-range spotting. Structures threatened.

* **Gulch**, Modoc NF. Three miles northwest of Canby, CA. Juniper and brush. Active fire behavior.

Predictive Services Discussion: Scattered showers and thunderstorms are expected in the Southwest U.S. with isolated storms and gusty wind in the Great Basin and central Rockies. An upper level disturbance will bring showers and thunderstorms to the upper Midwest and Great Lakes. Hurricane Arthur will weaken as it moves from New England toward Nova Scotia. Temperatures will remain very warm across much of the Western U.S. with high pressure anchored over the Four Corners region.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

"I recently attended a "Safety Summit" to help develop a Strategic Safety Plan. The question was asked, "Who's responsible for safety?" Management? Leadership? Supervisors?

To answer this question, I reflected on an "awakening" moment for me and felt a shot of adrenaline surge through me and couldn't be still. Typically I'm quiet in meetings, but this topic touched my soul and I couldn't hold back.

I reflected on my basic fire school training where I was taught to work hard, keep my head down, and dig...I was very young, up for the task, and "all in." Exciting stuff!

My first fire was a hike in, lightning struck Ponderosa Pine snag high on a ridge. We made the climb, and I did as instructed; head down, dig and work hard. My squad boss was "looking out for me" as I mopped under this huge snag and I stirred and mixed the embers.

I had an uncomfortable feeling inside but was determined to prove myself as a firefighter. I didn't like being under a big snag on fire, but went with my training and watched my squad boss. Suddenly, an overwhelming force launched me off my feet and I dove downhill. The top of the snag had fallen and miraculously missed me by inches. I broke two fingers in the dive but am very grateful to be alive!

So, the lesson I learned through this experience, and to answer the original question, is that I am absolutely in charge of my own safety. Keeping myself alive is something I cannot delegate to someone else. I must listen to that "feeling" and react. We work as a team and take care of each other, but definitely speak up if something doesn't feel right.

YOU are ultimately in charge of your safety."

*Written by Tim Blake
NWCG Preparedness Branch Coordinator*

Discussion Questions:

- *There will be situations where you lack experience and must rely on someone with more experience. What's the balance between self-reliance and deference to expertise?*
- *As a leader, how do you encourage your people to think for themselves yet work as a team?*

Resources: Your IRPG contains tools, guidelines and information to evaluate and mitigate risk, and if conditions warrant, how to properly refuse risk. Page 19-20.
