

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, July 26, 2014 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (171 new fires)
New large fires:	4(*)
Large fires contained:	1
Uncontained large fires: **	37
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	7
Type 2 IMTs committed:	15

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 air tankers and support personnel from the 153rd Airlift Wing (Wyoming Air National Guard) have been deployed to Boise, ID to support wildland fire suppression operations in the western U.S.

Northwest Area (PL 5)

New fires:	30
New large fires:	0
Uncontained large fires:	22
NIMOs committed:	1
Type 1 IMTs committed	6
Type 2 IMTs committed	12

Chiwaukum Complex, Okanogan/Wenatchee NF. Transfer of command from IMT 1 (Lewis) to IMT 1 (Dueitt) will occur tomorrow. IMT is also managing the Mills Canyon fire. Nine miles northwest of Leavenworth, WA. Timber, heavy logging slash and brush. Creeping and smoldering. Numerous residences threatened. Evacuations, area and road closures in effect.

Mills Canyon, Southeast Region, Washington DNR. Two miles southwest of Entiat, WA. Timber, brush and grass. Smoldering. Last report unless significant activity occurs.

Carlton Complex, Northeast Region, DNR. IMT 1 (Oplinger), IMT 1 (Blume), IMT 2 (Rabe), IMT 2 (Allbee) and NIMO (Hahnenberg). Started on private land seven miles south of Twisp, WA. Timber, light logging slash and brush. Creeping and smoldering with short runs and short-range spotting. Numerous residences threatened. Area and road closures in effect. Evacuations have been lifted.

Camp Creek, Vale District, BLM. IMT 2 (Watts). IMT is also managing the Buzzard Complex. Eleven miles southeast of Juntura, OR. Brush. Sage-grouse habitat threatened. No further information received.

Buzzard Complex, Burns District, BLM. Thirteen miles northwest of Riverside, OR. Juniper, brush and grass. Sage-grouse habitat threatened. No further information received.

Kitten Complex (4 fires), Vale District, BLM. IMT 1 (Poncin). Twelve miles south of Ironside, OR. Brush. Isolated short runs and torching. Structures threatened. Sage-grouse habitat threatened.

Rye Valley, Vale District, BLM. IMT 2 (Thorpe). Fifteen miles northwest of Huntington, OR. Brush. Minimal fire behavior. Sage-grouse habitat threatened.

Ochoco Complex, Ochoco NF. IMT 2 (Dunford). Twenty-eight miles east of Prineville, OR. Timber. Minimal fire behavior. Structures threatened. Sage-grouse habitat threatened. Reduction in acreage due to more accurate mapping.

Bridge 99 Complex, Deschutes NF. Transfer of command from IMT 2 (Fillis) back to the local unit will occur tomorrow. Twenty miles north of Sisters, OR. Mixed conifer, brush and grass. Smoldering. Structures threatened. Road and area closures in effect. Reduction in acreage due to more accurate mapping.

Logging Unit Complex (5 fires), Warm Springs Agency, BIA. IMT 1 (Schulte). Twenty-five miles northwest of Warm Springs, OR. Timber, medium logging slash and brush. Creeping and smoldering. Structures threatened. Reduction in acreage due to more accurate mapping.

Bingham Complex (2 fires), Willamette NF. Transfer of command from IMT 2 (Nickey) back to the local unit will occur tomorrow. Five miles east of Marion Forks, OR. Timber. Minimal fire behavior.

Waterman Complex, John Day Unit, Oregon DOF. Transfer of command from IMT 2 (Johnson) back to the local unit will occur today. Twenty miles northeast of Mitchell, OR. Timber, brush and grass. Creeping and smoldering. Area and road closures in effect.

Shaniko Butte, Warm Springs Agency, BIA. Transfer of command from IMT 2 (Williams) back to the local unit will occur today. Fifteen miles north of Warm Springs, OR. Juniper, brush and grass. Creeping and smoldering. Structures threatened.

Pine Creek, Prineville District, BLM. Transfer of command from IMT 2 (Fry) back to the local unit will occur today. IMT is also managing the Donnybrook and Black Rock fires. Eleven miles south of Fossil, OR. Juniper, brush and grass. Smoldering.

Donnybrook, Prineville District, BLM. Ten miles southeast of Antelope, OR. Juniper, brush and grass. Smoldering.

Black Rock, Prineville District, BLM. Started on private land ten miles east of Antelope, OR. Juniper and grass. Smoldering. Last report unless significant activity occurs.

Sunflower, Umatilla NF. Transfer of command from IMT 2 (Wilde) back to the local unit occurred yesterday. Ten miles north of Monument, OR. Timber and grass. Creeping and smoldering.

Lone Mountain 1, North Cascades NP. IMT 2 (Hutton). Three miles northeast of Stehekin, WA. Timber and brush. Creeping. Area closures in effect.

Center, Prineville District, BLM. Started on private land three miles northeast of Post, OR. Juniper, brush and grass. Minimal fire behavior.

Predictive Services Discussion: Warming and drying will be the focus for today's weather over the western U.S. as a ridge of high pressure strengthens. Showers and thunderstorms will continue over the Four Corners region where monsoonal moisture is trapped under the ridge. Further east, showers and thunderstorms are also expected in the Ohio Valley and New England along a cold front.

FIRE SHELTER DEPLOYMENT

Entrapment Category

Firefighters must never rely on fire shelters, but instead should depend on well-defined and pre-located escape routes and safety zones. However, if the need for shelter deployment should ever arise, it is imperative that the firefighter knows how to deploy and use the shelter.

- Don't think of your fire shelter as a tactical tool.
 - Recognize when deployment is your only option. When considering escape, remember that you can hold your breath for only about 15 seconds while running through flames or superheated air.
 - If time runs out while attempting to escape, get on the ground before the flame front arrives and finish deploying on the ground. Death is almost certain if the fire catches a person off the ground. (The optimal survival zone with or without a shelter is within a foot of the ground.) Once entrapped, the highest priority is to protect the lungs and airways.
 - When deploying, remove packs and place them away from the deployment area.
 - Even though deploying your shelter is a last resort, time is critical when entrapped. Play it safe; give yourself ample time to deploy. Failure to adequately anticipate the severity and timing of the burnover and failure to utilize the best location and proper deployment techniques contributed to the fatalities and injuries on the Thirty Mile incident. Don't let the cost of opening a shelter become a factor in your decision.
 - Before passing through superheated gases, try to close the front of your shroud. You can take your shelter out of the plastic bag and use it for a heat shield to pass quickly through a hot area. If you use the shelter in this way, don't drop it or allow it to snag on brush. Remember that your lungs are still vulnerable.
 - If flames contact the shelter, the glass/foil fabric heats up more rapidly. If flame contact is prolonged, spots of aluminum foil can melt or tear away, reducing protection. Even if this happens, it is still safer inside the shelter. Your flame-resistant clothing becomes your backup protection. It's even more critical to keep your nose pressed to the ground and stay in your shelter.
 - Remember, direct contact with flames or hot gases is the biggest threat to your shelter. It is vital to deploy in a spot that offers the least chance of such contact. The heavier the fuels, the bigger your fuel break needs to be.
 - Remember, once you commit yourself to the shelter, stay there. No matter how bad it gets inside, it is usually much worse outside. If you panic and leave the shelter, one breath of hot, toxic gases could damage your lungs. Suffocation may follow. Most firefighters were killed as a result of heat-damaged airways and lungs, not by external burns. Protect your airways and lungs at all costs by keeping your face close to the ground and staying in your shelter.
1. ***If your crew becomes entrapped, identify everything you and your crew/team are going to do to survive (start your discussion using pages 28-29 in your IRPG).***
 2. ***Activity: Consider having a mock fire shelter deployment exercise in realistic terrain and fuels using practice shelters (no live fire). Assess the exercise using an AAR.***
