

National Interagency Coordination Center
Incident Management Situation Report
Thursday June 5, 2014 – 0530 MT
National Preparedness Level 1

National Fire Activity

| | |
|-------------------------------|----------------------|
| Initial attack activity: | Light (62 new fires) |
| New large fires: | 1 (*) |
| Large fires contained: | 2 |
| Uncontained large fires: ** | 3 |
| Area Command Teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 1 |

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Hot and dry conditions will continue over California and the Southwest U.S. today with gusty winds developing over central New Mexico. From the Plains region to the Mid-Atlantic Coast showers and thunderstorms will develop along a weakening cold front as it continues to sag southward slowly.

UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

Weather / Fire Behavior Category

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
 - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion break)
