

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Wednesday June 11, 2014 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (79 new fires)
New large fires:	0 (*)
Large fires contained:	0
Uncontained large fires: **	3
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Northwest Area (PL 1)**

New fires:	7
New large fires:	0
Uncontained large fires:	1
Type 2 IMTs committed	1

**Two Bulls**, Sisters Unit, Oregon DOF. IMT 2 (Cline). Ten miles northwest of Bend, OR. Timber. Creeping and smoldering. Numerous residences threatened. Evacuations and road closures in effect.

Incident Name	St	Unit	Size	Size Chge 24 Hrs	% Ctn	Est Ctn	Totl Pers	Pers Chge 24 Hrs	Crw	Eng	Heli	Strc Lost	\$\$ CTD	Origin Own

**Predictive Services Discussion:** A weak area of low pressure will move across Nevada today, with very dry conditions and gusty winds developing behind it for the Great Basin and Southwest. Isolated lightning is also possible as this feature moves east. The Plains region through the Great Lakes may have severe storms along a frontal boundary while showers and thunderstorms are expected from the Northeast U.S. to the Mid-Atlantic region in association with a broad upper level trough. Cool and moist weather will settle over much of Alaska today as another weather system moves inland.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## THUNDERSTORM SAFETY

*Weather / Fire Behavior Category*

Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

Do not lie down.

- The best position is sitting on the pack or crouching with feet close together.
- Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.
- Avoid grouping together. Keep a minimum of 15 feet between people when possible.
- Removing caulk boots will not provide safety if stocking covered or bare feet are then in contact with the ground--don't bother!

"Stay out of dry creek beds" is correct for flash floods, but has nothing to do with lightning.

Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety. Do not use land line radios or radios with elevated antennas.

Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided.

If you feel the hair on your arms or head "stand up," there is a high probability of a strike in the vicinity. Crouch or sit on a pack.

Put down all tools.

Take shelter in vehicles if possible.
