

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday June 12, 2014 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (111 new fires)  
 New large fires: 2 (\*)  
 Large fires contained: 0  
 Uncontained large fires: \*\* 5  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 1

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Predictive Services Discussion:** It will be windy today for much of the Western U.S. preceding an unseasonably strong upper level low pressure system. This includes portions of the Pacific Northwest, California, the Great Basin and Desert Southwest. Although isolated thunderstorms are possible with this system, wind and very low humidity are the main concerns. Cool and unsettled weather will continue for much of the Eastern U.S. with thunderstorms focused along a cold front stretching from the Great Lakes to the Southern Plains. Alaska remains under low pressure today with scattered showers and thunderstorms.

## HELICOPTER LANDING AREA SAFETY

*Aviation Category*

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter. (Eye, hearing, head)
- Always get the approval of a flight crewmember or the pilot before approaching an operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember. Keep in pilot's field of vision at all times.
- Never go near the tail of helicopters.
- When loading helicopters in uneven terrain, always approach and depart from the down slope (lower) side and do not hold equipment overhead.
- Remove or secure loose articles prior to working around an operating helicopter.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
