

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Saturday June 21, 2014 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (91 new fires)
New large fires:	4 (*)
Large fires contained:	1
Uncontained large fires: **	6
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	2

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Southwest Area (PL 3)**

New fires:	4
New large fires:	1
Uncontained large fires:	2
Type 2 IMTs committed	1

**Asaayi Lake**, Navajo Region, BIA. IMT 2 (Day). Three miles southeast of Crystal, NM. Logging slash, timber and brush. Creeping and smoldering with isolated single tree torching. Residences threatened.

\* **Dehose**, Fort Apache Agency, BIA. Four miles east of Cibecue, AZ. Pinyon pine, juniper and grass. Active fire behavior.

Total	3	292,750	5	0	6	229

**Predictive Services Discussion:** A weak disturbance will move over the northern U.S. in a westerly flow. Scattered showers and a few thunderstorms will form over the northern Rockies to the Ohio Valley. Temperatures will remain warm across the Southwest, the Plains and the Southeast. Seasonal temperatures will continue over the Northwest, the northern Rockies and New England. In Alaska, areas of rain will continue over the eastern and central Interior and the southern part of the state.

## HELICOPTER LANDING AREA SELECTION

*Aviation Category*

Consider the following points when selecting a landing area for a helicopter:

- Locate a flat area that is of sufficient size for the helicopter you are expecting to land.
  - Type I -- Clear and level touchdown pad measuring 30 feet by 30 feet; safety circle measuring 110 feet in diameter.
  - Type II -- Clear and level touchdown pad measuring 20 feet by 20 feet; safety circle measuring 90 feet in diameter.
  - Type III -- Clear and level touchdown pad measuring 15 feet by 15 feet; safety circle measuring 75 feet in diameter.
- Choose an area clear of people, vehicles, and obstructions such as trees, poles, and especially overhead wires.
- The area must be free of stumps, brush, posts, large rocks or anything over 18 inches high.
- Consider the wind direction. Helicopters land and take off into the wind.
- Choose an approach free of obstructions. Any obstruction should be relayed to the helicopter crew during initial radio contact.
- Remove or secure any loose items in and around the landing area such as trash, blankets, hats, or equipment.
- Wet down the landing area if dusty conditions are present.
