

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Sunday June 22, 2014 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (62 new fires)
New large fires:	0 (*)
Large fires contained:	2
Uncontained large fires: **	4
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	2

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Predictive Services Discussion:** Weak westerly flow over the U.S. will continue to push weak disturbance across the northern states. Scattered showers and a few thunderstorms will develop over the northern and central Rockies. Scattered thunderstorms will also move across the upper and mid-Mississippi Valley and the Southeast. Temperatures will continue to warm slowly in the West and South while cooler weather moves into the northern Plains. In Alaska, scattered showers and a few thunderstorms will form across the central Interior and the southern part of the state.

## RESPONDING TO VEHICLE FIRES

*Vehicles/Roads Category*

Suppression of vehicle fires is extremely dangerous and poses many health and safety hazards to firefighters. The following procedures are recommended:

- Wear a high visibility reflective vest or other high visibility clothing if available.
- Secure the scene and provide or request assistance for traffic control.
- Park your vehicle to provide a protective barricade for you and your crew. Position it so that an inattentive or drunk driver will hit your vehicle and not your crew. Your vehicle is expendable, you are not.
- Provide for your escape route at the scene.
- Do not use road flares if fuel is leaking from the vehicle.
- DO NOT BREATHE ANY SMOKE. Smoke from vehicle fires contains toxic chemicals that will kill you.
- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-feet minimum), and avoid contact with vehicle fire smoke or fumes.

**Have an idea? Have feedback? Share it.**
