

National Interagency Coordination Center
Incident Management Situation Report
Friday, March 14, 2014 – 0800 MT
National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity:	Light (884 new fires)
New large fires:	10 (*)
Large fires contained:	5
Uncontained large fires: **	6
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Southern Area (PL 1)

New fires:	747
New large fires:	10
Uncontained large fires:	6

* **Goose**, Lacassine NWR. Seven miles southeast of Hayes, LA. Grass. Active fire behavior.

* **Long Creek**, Oklahoma DOF. Six miles northeast of Hugo, OK. Timber. Creeping.

* **Waldo**, Okmulgee Agency, BIA. Four miles northeast of Weleetky, OK. Hardwood litter. Creeping and torching.

* **McDowell**, Okmulgee Agency, BIA. Seven miles east of Wetumka, OK. Hardwood litter. Active fire behavior. Residences threatened.

Rocks Mtn., Shenandoah NP. Nine miles north of Waynesboro, VA. Timber litter. Minimal fire activity. Commercial and residential structures threatened.

* **Bird Creek**, Okmulgee Agency, BIA. Five miles east of Weleetky, OK. Hardwood litter. Creeping and smoldering. Residences threatened.

NFDRS PocketCards

Weather/Fire Behavior Category

The NFDRS PocketCard is a tool for field personnel to locally track outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season. It is based on current and historical weather for a localized area and the area's historic fire occurrence. The PocketCard displays a general assessment of the fire potential and identifies combinations of local weather and fuel conditions that might contribute to severe fire behavior.

The PocketCard provides:

- A general indicator of the potential fire danger for a given rating or protection area.
- A graph showing the trend and status of the current year's fire season.
- A comparison of current year conditions to historical worst and average conditions.
- Fire danger values related to past large or problem fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures associated with large or problem fires.

Discuss the following ways to use the PocketCard:

- Use it primarily before fires occur, before arriving to a fire. It is also useful during initial fire size-up, initial attack, and extended attack.
- Use it to learn of critical thresholds that predict the potential for extreme fire behavior for the local area. Be aware that local critical thresholds may be occurring earlier in the season.
- Use it to compare current and predicted local fire danger to historical local fire danger to enhance situational awareness.
- Use it to track daily fire danger indices that gauge the potential for weather and fuels to support extreme fire behavior and of the difficulty of control.
- Use it to supplement local experience.
- Use it as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive a fire assignment outside your local area, visit the National PocketCard website at <http://fam.nwcg.gov/fam-web/pocketcards/default.htm> where PocketCards are filed by Geographic Area.
- Put it in the pocket of all your firefighters and keep one in your fire vehicle.
- Post it in dispatch. Use them in briefings. Provide them to incoming crews.
- **Do not use the PocketCard for site specific fire behavior predictions and fireline actions or without an interpretive briefing.**
- Review definitions and implications of ERC and BI values.
