

National Interagency Coordination Center
Incident Management Situation Report
Saturday, May 31, 2014 – 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (40 new fires)
New large fires:	3 (*)
Large fires contained:	1
Uncontained large fires: **	7
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires:	14
New large fires:	0
Uncontained large fires:	3
Type 1 IMTs committed	1

Slide, Coconino NF. Transfer of command from IMT 1 (Sciacca) back to the local unit will occur today. Six miles north of Sedona, AZ. Timber. Minimal fire behavior. Numerous structures threatened.

Black River Tank, Fort Apache Agency, BIA. Twenty-one miles southeast of Whiteriver, AZ. Pinyon pine, juniper and brush. Running and spotting.

Spring, San Carlos Agency, BIA. Eighteen miles northeast of San Carlos, AZ. Timber and grass. No new information.

Predictive Services Discussion: Dry southwesterly flow will continue to bring breezy conditions to portions of the Western U.S. with near-normal temperatures. Showers and thunderstorms with heavy rain are expected to continue in the Central and Northern Plains due to an upper level disturbance. A persistent closed low pressure system will continue to move east through the Gulf Coast with thunderstorms while much of the Eastern U.S. will see mild and dry conditions today.

RETARDANT, PARACARGO & WATER DROP SAFETY

Aviation Category

Having retardant (jell, foam), paracargo, and water dropped on a fire should be a routine event. However, there are risks associated drops that can pose serious threats to personnel and equipment. Consider the following for all drops:

- Be aware of the location and flight patterns (final approach, drop zone, exit) of aircraft during drop operations.
- Be sure you have positive contact with the pilot before the drop.

All persons, vehicles, and animals should be cleared from the danger zone prior to the arrival of the aircraft.

Beware of "streamers" or parachutes that don't open.

- Personnel can be injured by the impact of material dropped by aircraft. Clear personnel out of the target area when the drop is conducted. If an individual is caught unaware in a drop zone:
 - Hold your hand tool away from your body.
 - Lie face down with hardhat in place and head toward the oncoming aircraft.
 - Grasp something firm to prevent being carried or rolled about by dropped liquid.
 - Do not run unless escape is ensured.
 - Get clear of dead snags and tops.
 - Be aware of rolling debris below the drop site in steep terrain.
- Working in an area covered by retardant should be done with caution due to slippery surfaces.
- If possible, wash the retardant off your skin to prevent irritation.
