

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, October 10, 2014 – 0530 MT  
National Preparedness Level 1**

**National Fire Activity (Weekly Total)**

Initial attack activity: Light (265 new fires)  
 New large fires: 3 (\*)  
 Large fires contained: 3  
 Uncontained large fires: \*\* 2  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 2  
 Type 2 IMTs committed: 0

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

On October 7 a Cal Fire pilot was fatally injured when his Grumman S-2T air tanker crashed while assigned to the Dog Rock fire in Yosemite National Park. The firefighting community extends condolences to the family and friends of the deceased.

**Northern California Area (PL 2)**

New fires: 48  
 New large fires: 1  
 Uncontained large fires: 1  
 Type 1 IMTs committed: 1

\* **Applegate**, Nevada-Yuba-Placer Unit, Cal Fire. Cal Fire IMT 1 (Zombro). One mile east of Applegate, CA. Timber and brush. Moderate fire behavior with short-range spotting. Numerous residences threatened. Evacuations in effect.

**Predictive Services Discussion:** Upper level high pressure will build over California through early next week with hot and dry conditions as well as light to moderate offshore winds through Monday. Beyond that, there will be cooler weather across portions of the western U.S. as a series of storms takes aim over the Pacific Northwest and Northern Rockies. East of the Mississippi River it will be unsettled through this weekend with widespread heavy rain and thunderstorms resulting from a deep upper level trough and a plentiful Gulf moisture tap. A drying trend will develop over the eastern U.S. by mid-week, while it will become progressively more cool and moist in the west.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

*“Fitness can neither be bought nor bestowed,  
like honor it must be earned”*

*Miscellaneous Category*

The FireFit program was created with the intent of providing the interagency wildland fire community with a comprehensive, easy-to-follow, fitness program with the ultimate goal of improving firefighter safety and health and reducing injuries. This program provides a basic format for a well balanced fitness program that can be augmented as local units see fit. Program success will rely on management support at every level as well as individual's motivation and participation.

Wildland firefighters know that physical fitness plays an important role in our job performance and our ability to stay safe. The level of fitness required for the job is one that requires maintenance during the off-season.

**Post-Season Fitness Module Objective: *(all fitness modules are found on the website)***

This module initially provides a transition from the fire-season program in order to allow time for rest and recuperation, and injury rehabilitation. After the initial 2 week rest/recovery phase, the program is designed to provide a transition to develop and maintain a baseline fitness level in preparation for the pre-season phase and optimal fitness.

The post-season module is also developed with flexibility in order to encourage cross-training and a diversity of activities that are fun and enjoyable. Initial concentration will be on identifying any injuries sustained during the fire season that need mitigation and/or rehabilitation. It will also allow for 2 weeks without training in order to allow the body to relax, physically and mentally. Once exercise is implemented, the primary focus will be on adhering to

- Low impact cardiovascular activities,
- muscle balance, and good flexibility.

Go to the [FireFit](#) homepage and click on [Post Fire Season Exercises](#) for many more ideas.
