

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, October 24, 2014 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity (Weekly Total)**

Initial attack activity:	Light (175 new fires)
New large fires:	1 (*)
Large fires contained:	0
Uncontained large fires: **	0
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Rocky Mountain Area (PL 1)**

New fires:	8
New large fires:	1
Uncontained large fires:	0

\* **Okreek**, South Dakota Wildland Fire Suppression. Fifteen miles northeast of Wood, SD. Grass. Smoldering.  
Last report unless significant activity occurs.

**Predictive Services Discussion:** A moist, upper level disturbance originating in the Gulf of Alaska will move inland this weekend with precipitation spreading eastward through the Intermountain West and Great Basin. Another trough next week will tap into tropical moisture with widespread wetting rain and mountain snowfall in northern California, the Pacific Northwest, and the Great Basin before moving east through the central Plains. Gusty winds are expected for the Rocky Mountain region and adjacent High Plains in conjunction with a strong cold front this weekend. Locally gusty winds are also anticipated this weekend in southern California and the southwest U.S. In contrast, heavy precipitation and strong winds are forecast early next week for the Gulf Coast and southeast U.S. in association with a tropical storm in the Gulf of Mexico.

## LOOKOUTS (LCES)

*Operational Engagement Category*

Lookouts are often better situated to notice the cumulative changes of fire behavior.

- Fire Order #5 says “Post lookouts when there is possible danger.” Should you utilize lookouts at all times?
  - Lookouts should be posted at all times.
- What are you looking for when you are selecting a lookout location?
  - Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
  - Never rely exclusively on aircraft as your lookout.
- What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?
  - Experienced firefighter.
  - Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
  - Knowledge of crew locations, escape and safety locations and trigger points.
  - Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
  - Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.
- What is the necessary equipment for a lookout?
  - PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, water and watch.
