

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Tuesday, September 2, 2014 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (63 new fires)
New large fires:	0 (*)
Large fires contained:	0
Uncontained large fires: **	8
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	1

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Northern California Area (PL 3)**

New fires:	16
New large fires:	0
Uncontained large fires:	4
Type 1 IMTs committed:	3

**Happy Camp Complex** (2 fires), Klamath NF. IMT 1 (Pincha-Tulley) and IMT 1 (McGowan). One mile east of Happy Camp, CA. Timber, brush and grass. Active fire behavior with torching. Numerous structures threatened. Evacuations and area closures in effect.

**July Complex** (2 fires), Klamath NF. IMT 1 (Opliger). Four miles east of Sawyers Bar, CA. Timber. Moderate fire behavior. Structures threatened. Evacuations, road and area closures in effect.

NR	5	9,552	2	4	0	78
EB	1	470	0	0	0	1
WB	0	0	0	0	0	0
SW	3	11,490	1	2	0	30
RM	1	1,529	0	0	0	3
EA	0	0	0	0	0	0
SA	0	0	0	0	0	0
Total	15	55,410	11	33	6	529

**Predictive Services Discussion:** Dry and breezy weather is expected to continue today across the entire western U.S., while east of the Rockies, showers and thunderstorms will develop from the central Plains through the Northeast. It will also be unsettled with storms over the mid-Atlantic states today.

## VEHICLE ENTRAPMENT

*Vehicles & Roads Category*

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Burn out around the vehicle if there is time.
- Park behind a natural barrier or structure. Consider that a structure could become involved, which then could severely impact nearby exposures/vehicles (Harris Fire, SoCal, 2007).
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles and draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking brake, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters, with the reflective material placed against window.
- You must protect your airway; remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
  - Temperatures may reach over 200 degrees Fahrenheit.
  - Smoke and sparks may enter the vehicle.
  - Plastic parts may start to melt and give off toxic gases.
  - Windows may start to crack.
  - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
  - Each crewmember should cover his/herself with a fire shelter.
  - Exit the vehicle from the side away from the greatest heat.
  - Stay together and get as low to the ground as possible, moving away from the vehicle.
  - Deploy your shelter in a safe area.
