

National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 3, 2014 – 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (103 new fires)
New large fires:	0 (*)
Large fires contained:	0
Uncontained large fires: **	8
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	1

** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires:	20
New large fires:	0
Uncontained large fires:	4
Type 1 IMTs committed:	3

Happy Camp Complex (2 fires), Klamath NF. IMT 1 (Pincha-Tulley) and IMT 1 (McGowan). One mile east of Happy Camp, CA. Timber, brush and grass. Active fire behavior with spotting and crown runs. Numerous structures threatened. Evacuations and area closures in effect.

July Complex (2 fires), Klamath NF. IMT 1 (Opliger). Four miles east of Sawyers Bar, CA. Timber. Moderate fire behavior. Structures threatened. Area closure in effect.

Northwest Area (PL 3)

New fires:	5
New large fires:	0
Uncontained large fires:	4
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

Deception Complex (2 fires), Willamette NF. IMT 1 (Schulte). Two miles west of Oakridge, OR. Timber. Moderate fire behavior with isolated torching. Structures threatened. Area closures in effect.

Lost Hubcap, John Day Unit, Oregon DOF. ODF IMT 1 (Cline). Eight miles southwest of Monument, OR. Timber, brush and grass. Minimal fire behavior. Structures threatened.

790, Rogue River-Siskiyou NF. IMT 2 (Fillis). Thirty miles northeast of Medford, OR. Timber. Isolated interior torching. Area closure in effect.

South Fork Complex, Prineville District, BLM. Twenty miles southwest of John Day, OR. Timber, brush and grass. Creeping and smoldering with occasional torching. Area closures in effect. Last report unless significant activity occurs.

Predictive Services Discussion: A strong cold front will move southeastward through the Great Basin and northern Rockies today. This will bring dry and breezy weather to much of the Intermountain West, especially the central Rockies. Cooler temperatures and higher humidity will result in the Pacific Northwest and northern California from this trough. Ahead of this feature, there will be showers and thunderstorms in the upper Great Lakes region along a warm front. Tropical Storm Dolly will provide heavy rain showers and thunderstorms for south Texas, while the southeast U.S. will also see storms from the Gulf Coast through the mid-Atlantic today.

EXTREME FIRE BEHAVIOR 2

Weather / Fire Behavior Category

Mild, moderate and EXTREME fire behavior has always been present in cases of shelter deployment. It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions, as well as predicted and current weather conditions. As fire behavior changes, it is critical to respond correctly to the changing situation.

- Discuss how the following factors can contribute or lead to extreme fire behavior:
 - Frost Kill: Has there been a late or unusually extensive freeze? Is the loading of frost-killed fuels high?
 - Drought Conditions: Live Fuel Moistures Index, KBDI, Soil Moisture Index, low humidity, high temperatures
 - Slope: Increases fire spread uphill, preheats fuels by convection, may channel winds

Sea Breeze/Foehn: Wind direction may vary throughout the day, humidity changes may occur; strong wind velocities may drive fire behavior to extremes.

- To aid situational awareness, track NFDRS live and dead fuel moisture outputs.
- Take hourly weather observations and track the hourly changes. By tracking fuel moisture and weather observations and using Fire Severity Related to Fuel Moisture Chart, firefighters can be alerted to those conditions that can lead to situations where there is a high potential for extreme fire behavior.
