

National Interagency Coordination Center
Incident Management Situation Report
Friday, April 24, 2015 – 0800 MT
National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity:	Light (549 new fires)
New large incidents:	6 (*)
Large fires contained:	7
Uncontained large fires: **	5
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>.

Predictive Services Discussion: The pattern across the U.S. will remain progressive as a series of troughs and ridges drift across the country through the week. A broad trough over the West with a couple of embedded closed lows will bring cool and showery conditions to the region through the weekend. A few thunderstorms are possible, especially over the mountains. A building ridge with warm and dry weather will slide into the region by Tuesday. Another trough will position itself to bring scattered showers and thunderstorms into the West again by the end of the week. Over the Plains and the East, warm weather will give way to another round of thunderstorms as a cold front slides across the country during the week. By the end of the week, high pressure over the Plains will end precipitation and rapidly raise temperatures. Showers and thunderstorms will continue in the East into the weekend.

MY SAFETY

Leadership Category

An important aspect of safety is individual responsibility for one's own health & safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility be taught as the basis for a viable safety program. Some of those individual responsibilities are:

- Fitness for duty. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training are the foundation of "My Safety".
- Utilization of personal protective equipment. Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. If a hazard is identified that can be mitigated by wearing a particular PPE component it should be utilized. Fireline supervisors have more important duties to focus on other than performing glove patrol.
- Following safe work practices. Using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure of how to perform a job task safely, ask your supervisor or experienced coworker.
- Using the correct reference materials is an important aspect of safety. You should have a working knowledge of the Red Book, IRPG, and your local operating guidelines.
- Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place yourself or others at risk.
- Maintain situational awareness at all times. Awareness is a vital component of "My Safety". Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or making comments.

Summary: Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.

Discussions points:

1. *Talk about ways you can improve on your safety.*
2. *Have your supervisor talk about their expectations for individual safety.*

Have an idea? Have feedback? Share it.
