

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, August 2, 2015 - 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Light (161 new fires)
New large incidents:	7
Large fires contained:	5
Uncontained large fires: **	20
Area Command Teams committed:	1
NIMOs committed:	1
Type 1 IMTs committed:	11
Type 2 IMTs committed:	6

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Five wildland fire suppression crews and an IARR are assigned to support large fires in Alberta, Canada. Additionally, several states are supporting Canada through interstate forest fire compacts.

**Northern California Area (PL 4)**

New fires:	40
New large incidents:	3
Uncontained large fires:	11
NIMOs committed:	1
Type 1 IMTs committed:	6
Type 2 IMTs committed:	3

Area Command Team (Van Bruggen) is assigned to assist in the coordination of operations at the Northern California Geographic Area Coordination Center.

**Fork Complex**, Shasta-Trinity NF. IMT1 (Opliger), IMT 2 (Young) and IMT 2 (Johnson). Three miles east of Hayfork, CA. Timber. Active fire behavior with isolated torching, backing and creeping. Numerous structures threatened. Evacuations and road closures in effect.

**Rocky**, Sonoma-Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Patterson). Six miles east of Lower Lake, CA. Timber and chaparral. Extreme fire behavior with group torching, short-range spotting and running. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

\* **Humboldt LCA**, Humboldt-Del Norte Unit, Cal Fire. Five miles west of Phillipsville, CA. Timber. Moderate fire behavior with short crown runs, running and backing. Numerous structures threatened.

\* **Mad River Complex**, Six Rivers NF. IMT 1 (Minton). Eight miles south of Mad River, CA. Timber, chaparral and tall grass. Extreme fire behavior with uphill runs, short crown runs and long-range spotting. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

\* **Barker**, Shasta-Trinity Unit, Cal Fire. Six miles northeast of Hayfork, CA. Timber, brush and short grass. Active fire behavior with isolated torching and short-range spotting. Structures threatened. Evacuations and road closures in effect.

**River Complex (2 fires)**, Shasta-Trinity NF. IMT 1 (Vontillow). Three miles southwest of Denny, CA. Timber, chaparral and brush. Active fire behavior with isolated torching and backing. Numerous structures threatened. Evacuations and road closures in effect.

**Frog**, Modoc NF. NIMO (Houseman) and IMT 2 (Kurth). Five miles west of Scarface, CA. Timber and brush. Active fire behavior with wind-driven runs, group torching and spotting. Structures threatened. Road, area and trail closures in effect.

**Lowell**, Nevada-Yuba-Placer Unit, Cal Fire. IMT 1 (Gouvea). Two miles west of Gold Run, CA. Timber. Minimal fire behavior with creeping and smoldering. Structures threatened. Road, area and trail closures in effect.

**Wragg**, Sonoma-Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Estes). Four miles west of Winters, CA. Chaparral, brush and short grass. Minimal fire behavior with smoldering.

**Swedes**, Butte Unit, Cal Fire. Three miles north of Bangor, CA. Brush. Minimal fire behavior with smoldering.

**Predictive Services Discussion:** An upper level ridge of high pressure over the western U.S. will continue to bring hot, dry and unstable conditions to portions of the Pacific Northwest and northern Rockies today. This ridge will begin to shift slightly eastward toward the central Rockies as an upper level disturbance carves its way through the Great Basin, providing a surge of monsoonal moisture for showers and thunderstorms through northern California northward into the Pacific Northwest through tonight and tomorrow. Wetting rain may result from some storms, but overall abundant lightning and gusty winds are of more concern. Showers and thunderstorms are also expected over portions of the Four Corners region as moisture cycles through the high pressure ridge. As the ridge slides eastward, southern California and the Desert Southwest will begin to see some drying, with relief from recent heavy rain and flooding. East of the Rockies, the southeast U.S. and Great Lakes regions will also see showers and thunderstorms today. A drying trend is underway over the Southern half of Alaska, while low pressure over the northern stretches will bring cooler, showery weather.

## Proper Use of Trigger Points

*Weather/Fire Behavior Category*

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watchout Situations and establishing operational / environmental limits (“trigger points”) ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don’t wait until you’re in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
  - RH
  - Winds
  - Fire Behavior
  - Topographical boundaries
  - Time constraints/Time of day
  - Time/distance to safety zones
  - Loss of suppression resources
  - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See the Incident Response Pocket Guide)
  - Gather information to assure good Situational Awareness
  - Assess hazards to anticipate serious risks
  - Establish hazard controls to mitigate serious risks
  - Make decisions based on your ability to mitigate those serious risks
  - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
  - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
  - Account for all your people
  - Make sure everyone knows and follows the new plan
