Predictive Services Discussion: An upper level trough will move toward southern British Columbia, pushing a cold front into the Northwest. Scattered showers and thunderstorms will develop across the northern Great Basin and the northern Rockies ahead of the front while gusty westerly winds slide into Oregon and Washington. Elsewhere, rain and thunderstorms will continue along a nearly stationary front across the Plains and the Mid-Mississippi Valley. Cool but breezy and dry weather will move into the Great Lakes region while very hot and humid weather remains over the Gulf states. Thunderstorms and heavy rain will continue over Florida. In Alaska, warm and dry weather will continue in the Interior with widely scattered showers moving across the south and the north.
