**Predictive Services Discussion:** An upper level low pressure system off the Pacific Coast will continue to circulate moisture and instability to the northwest quarter of the Nation, resulting in thunderstorm activity. Some storms may be accompanied by gusty winds. Monsoon moisture will provide showers and thunderstorms to the southern and central Rockies on the western periphery of a strengthening high pressure ridge. In between these features, much of California will see a dry, southwest flow aloft. As the ridge builds over the central U.S. into Canada, temperatures will climb well above normal over the west, with cooler than normal conditions in the east. Along the Atlantic coast, showers and thunderstorms will focus near a cold front. Hot and humid conditions will continue today over the southern Plains and Lower Mississippi Valley. A trough of low pressure over Alaska will keep conditions cool and showery.

## FIGHT FIRE AGGRESSIVELY, BUT PROVIDE FOR SAFETY FIRST

*Operational Engagement Category*

Standard Fire Order #10 must be taken into account at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

- Is the suppression method adequate? Ask yourselves, are we making progress? Are we beating our heads against a wall? Is there a better way to get this done? Give examples when you have had to change your suppression method.
- Are there adequate resources and time for effective suppression? Ask yourselves, do we need to retreat and reevaluate? Talk about times when you have realized you weren't getting anywhere and needed to retreat and start managing firefighters and placing orders.
- Are lookouts posted? Discuss when you post lookouts, who you would choose to be a lookout, and where they should be located.
- Are communications prompt with crews and other resources? Review the importance of good communications on the fireline.
- Have escape routes and safety zones been established? Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.
- Do you feel comfortable with your assignment? Discuss the situation check. Remind firefighters that every individual has the right to question an assignment.
- To reduce the risks:
  - Post lookouts.
  - Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
  - Do you have established trigger points?
