**Predictive Services Discussion:** High pressure will continue over the western U.S. today with warm, dry, and breezy weather overall. A shortwave trough will bring scattered showers and thunderstorms to the southwest, including southern California. Isolated thunderstorms are also anticipated through the Four Corners region and higher elevations of the Rockies. The eastern half of the Nation will be under an unseasonably strong trough of low pressure centered over the Great Lakes, where conditions will be cool and showery from the upper Mid-West through the Northeast. Heavy rainfall may produce flash flooding in Hawaii as Tropical Depression Kilo and Tropical Storm Loke move through.

## DOWNHILL FIRELINE CONSTRUCTION CHECKLIST

*Operational Engagement Category*

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with resources until the job is completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
  - Crew supervisor(s) is in direct contact with lookout who can see the fire.
  - Communication is established between all crews.
  - Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
- Can fire be carried with you?
