**Predictive Services Discussion:** The southwest U.S. will begin to see an increase in storm activity resulting from the remnants of Hurricane Blanca as moisture surges northward. Over the Intermountain west isolated showers and thunderstorms are expected in the mountains, with high pressure establishing a warming and drying trend overall. East of the Rockies, showers and thunderstorms are expected from the central Plains eastward through the Tennessee Valley and mid-Atlantic coast. Alaska will see very little change in the weather pattern, with scattered showers and isolated thunderstorms continuing, especially in the Western part of the State.

## OPERATIONAL BRIEFINGS

*Fire Communications Category*

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the cover of the NWCG Incident Response Pocket Guide:

- Situation:
  - Fire name, location, map orientation, other incidents in the area
  - Terrain influences
  - Fuel type and conditions
  - Fire weather (previous, current, and expected)
  - Fire behavior (previous, current, and expected)
- Mission/Execution:
  - Command (Incident Commander/immediate supervisor)
  - Leader's intent
  - Specific tactical assignments
  - Contingency plans
- Communications:
  - Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.)
  - Medevac Plan
- Service/Support:
  - Other resources that may be working adjacent to you and those available to order
  - Aviation operations
  - Logistics (e.g., transportation, supplies, equipment)
- Risk Management:
  - Identify known hazards and risks
  - Identify control measures to eliminate hazards and reduce risk
  - Identify trigger points for disengagement or reevaluation of operational plan
