

**National Interagency Coordination Center
Incident Management Situation Report
Friday, June 26, 2015 - 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Moderate (201 new fires)
New large incidents:	22
Large fires contained:	0
Uncontained large fires: **	23
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	11

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Alaska Area (PL 5)

New fires:	18
New large incidents:	18
Uncontained large fires:	11
Type 2 IMTs committed:	11

Rex Complex (two fires), Fairbanks Area Forestry, DOF. IMT2 (Sheldon). Started on private land southeast of Clear, AK. Timber, brush and tall grass. Active fire behavior with short-range spotting, single tree torching and flanking. Structures threatened. Evacuations, road and trail closures in effect.

Spicer Creek, Tanana Zone, BLM. IMT2 (Staats). IMT is also managing the Bering Creek, Moose Point, Harper Bend, Kokrine, Hay Slough, Blind River and Tozitna fires. Started on native corporation land seven miles northeast of Tanana, AK. Timber. No new information.

* **Bering Creek**, Tanana Zone, BLM. Thirty-five miles west of Tanana, AK. Timber. Extreme fire behavior.

Moose Point, Tanana Zone, BLM. Started on state land 50 miles west of Tanana, AK. Timber. Active fire behavior.

* **Harper Bend**, Tanana Zone, BLM. Twelve miles southeast of Tanana, AK. Timber. Moderate fire behavior. Structures threatened.

* **Kokrine**, Tanana Zone, BLM. Started on state land 55 miles west of the Tanana, AK. Timber. Minimal fire behavior.

Hay Slough, Tanana Zone, BLM. Fourteen miles southeast of Tanana, AK. Timber. No new information.

* **Blind River**, Tanana Zone, BLM. Twenty miles west of Tanana, AK. Timber. Extreme fire behavior.

Tozitna, Tanana Zone, BLM. Four miles northwest of Tanana, AK. Closed timber litter. No new information.

Nulato, Galena Zone, BLM. Started on native corporation land in Nulato, AK. Timber. Moderate fire behavior with torching and flanking. Numerous structures threatened.

Anaconda Creek, Fairbanks Area Forestry, DOF. IMT2 (Allen). Twenty-four miles northeast of Fairbanks, AK. Timber. Active fire behavior. Numerous structures threatened. Reduction in acreage due to more accurate mapping.

Aggie Creek, Fairbanks Area Forestry, DOF. IMT2 (Rosenthal). Thirty miles northwest of Fairbanks, AK. Timber. Moderate fire behavior with torching, creeping and smoldering. Structures threatened.

Healy Lake, Delta Area Forestry, DOF. IMT2 (Bentley). Started on native corporation land twenty-eight miles southeast of Delta Junction, AK. Timber. Moderate fire behavior. Structures threatened. Reduction in acreage due to more accurate mapping.

Card Street, Kenai-Kodiak Area Forestry, DOF. IMT2 (Allbee). Started on native corporation land five miles southeast of Sterling, AK. Timber. Moderate fire behavior with single tree torching, creeping and smoldering. Structures threatened. Area and trail closures in effect.

Stetson Creek, Chugach NF. IMT2 (Goff). IMT is also managing the Juneau Lake fire. Timber. Minimal fire behavior with creeping and smoldering. Area and trail closures in effect.

Juneau Lake, Chugach NF. Five miles north of Cooper Landing, AK. Timber and brush. No new information.

Ruby Slough, Galena Zone, BLM. IMT2 (Hutton). Five miles southwest of Ruby, AK. Timber, brush and short grass. No new information.

Sockeye, Mat-Su Area Forestry, DOF. Started on private land six miles north of Willow, AK. Timber. Minimal fire behavior. Numerous structures threatened.

Long Lake, Tok Area Forestry, DOF. Two miles east of Northway, AK. Timber. Moderate fire behavior with torching and smoldering. Structures threatened.

Tanana Slough, Tok Area Forestry, DOF. Started on native corporation land four miles north of Dot Lake, AK. Timber. Moderate fire behavior with isolated torching.

Nenana Ridge, Fairbanks Area Forestry, DOF. Twelve miles east of Four Mile Rd, AK. Hardwood litter, brush and tall grass. Active fire behavior with spotting and creeping. Reduction in acreage due to more accurate mapping.

Iditarod River, Southwest Area Forestry, DOF. Three miles north of Iditarod, AK. Timber. Extreme fire behavior. Structures threatened. Evacuations in effect. Last report unless significant activity occurs.

Chisana River 2, Tok Area Forestry, DOF. Started on NPS land 25 miles west of Beaver Creek, AK. Timber. Moderate fire behavior with torching and smoldering. Structures threatened. Last report unless significant activity occurs.

Blair, Military Zone, BLM. Thirty-nine miles southeast of Fairbanks, AK. Closed timber litter. Active fire behavior with torching and short-range spotting. Structures threatened. Last report unless significant activity occurs.

* **North Aniak**, Southwest Area Forestry, DOF. Two miles north of Aniak, AK. Timber. Extreme fire behavior. Structures threatened. Last report unless significant activity occurs.

* **Village Creek**, Southwest Area Forestry, DOF. Six miles west of Crooked Creek, AK. Timber. Active fire behavior. Last report unless significant activity occurs.

* **Rainbow**, Upper Yukon Zone, BLM. Seventy-three miles northeast of Fort Yukon, AK. Timber. Active fire behavior with torching and backing. Last report unless significant activity occurs.

* **Soda Creek**, Southwest Area Forestry, DOF. Seventeen miles northeast of Medfra, AK. Timber. Active fire behavior. Last report unless significant activity occurs.

* **Kilo**, Tanana Zone, BLM. Fifty miles west of Rampart, AK. Short grass. Minimal fire behavior. Last report unless significant activity occurs.

* **Old Village**, Southwest Area Forestry, DOF. One hundred miles west of Beluga, AK. Timber. Moderate fire behavior. Last report unless significant activity occurs.

* **Hardpac Creek**, Upper Yukon Zone, BLM. Fifty-four miles northwest of Beaver, AK. Closed timber litter and short grass. Active fire behavior with short crown runs. Last report unless significant activity occurs.

* **Red Devil**, Southwest Area Forestry, DOF. Two miles north of Red Devil, AK. Timber. Extreme fire behavior with crowning and running. Structures threatened. Last report unless significant activity occurs.

* **Mission Creek**, Southwest Area Forestry, DOF. Two miles northwest of Aniak, AK. Timber. Active fire behavior with torching and flanking. Structures threatened. Last report unless significant activity occurs.

* **Goodpaster Valley**, Delta Area Forestry, DOF. Thirty-two miles northeast of Delta Junction, AK. Timber and brush. Moderate fire behavior with torching and creeping. Structures threatened. Last report unless significant activity occurs.

* **Chahalie Lake**, Upper Yukon Zone, BLM. Ten miles northeast of Chalkyitsik, AK. Timber. Active fire behavior with torching and creeping. Last report unless significant activity occurs.

* **Keefer Cutoff**, Southwest Area Forestry, DOF. Seven miles north of Portage Creek, AK. Timber. Moderate fire behavior. Last report unless significant activity occurs.

* **Sea**, Tanana Zone, BLM. Sixty miles southeast of Ruby, AK. Short grass. Minimal fire behavior. Last report unless significant activity occurs.

* **Torment Creek**, Tanana Zone, BLM. Forty miles northwest of Rampart, AK. Short grass. Minimal fire behavior. Last report unless significant activity occurs.

Predictive Services Discussion Hot and dry conditions will take hold of the western U.S. today as an upper level high pressure ridge dramatically expands northward from the Four Corners region. Record setting temperatures are expected over the next several days, and may persist well into July. Thunderstorms with lightning and gusty winds are expected to develop over portions of southern Nevada, northern California and southwest Oregon today and tonight. Little if any precipitation is expected with these storms. Showers and thunderstorms over the southern and central Rockies will produce some precipitation, however. Additionally, showers and thunderstorms will develop again north of a frontal boundary stretching from the southern Plains through the Ohio Valley and Mid-Atlantic coast. Thunderstorms are also anticipated for the Gulf Coastal region, including Florida. Breezy conditions will develop over Alaska with a chance of rain in the northwest and a slight moderation in temperatures with less lightning in the southeast.

This report contains information derived from the National Fire and Aviation Management Web Applications (FAMWEB) system and other sources to provide relative information about emerging and ongoing incident activity. This information is considered operational in nature, is subject to change, and therefore may not match official year-to-date agency records.

**** National Interagency Coordination Center ****

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

Dude Fire – June 26th 1990 - Arizona

Incident Summary: June of 1990 will long be remembered as one of the hottest months in Arizona history. On June 26th the temperature rose to record temperatures of 122 F in Phoenix and to 106 F in Payson. In addition to the extreme temperatures, Arizona had been in a severe 3 year drought, the combination producing a critically high fire danger throughout the state, especially the Mogollon Rim country and the Tonto National Forest north of Payson. Fuels in the area are primarily ponderosa pine with an understory of mixed oak, manzanita, needle and leaf litter, and scattered large (greater than 6 inch diameter) dead logs. Much of the understory brush is heavily draped with very dry pine needles. Live fuel moisture of the manzanita and oak is very low (76%), fine dead fuel moisture is 3% and 8% for larger dead fuels.

At 1230 June 25th, 1990, a dry lightning storm starts a fire under the Mogollon Rim on the Payson Ranger District, Tonto NF Arizona. The fire is on a steep SW facing slope at 6400 ft. elevation. At 1330, the fire is estimated from the air at 5 acres, 50 acres one hour later, and over 100 acres by 1615 with a spot fire one mile east of the main fire. By 1800 a Type II IMT has arrived and a Type I IMT and 18 crews had been ordered. The fire is being pushed by brisk down canyon winds and is 1900 acres by 0500 the 26th and is threatening the forest subdivision of Bonita Creek Estates. A convection column, aided by combustion, begins forming over the fire by 1000. The column continued to grow and becomes a fully mature thunderstorm by 1400. Radio and frequency issues are causing a breakdown in communication between the crews and the overhead team. The teams are transitioning mid-shift resulting in confusion between the crews and supervision. The thunderstorm begins to decay creating strong downbursts channeled by the topography, causing dramatic down and across slope fire spread on nearly all sides of the fire. Members of the Perryville Fire Crew will not be able to escape from the fast and erratic fire spread. **Five are injured. Six will die on the fireline.**

Lessons Learned Discussion Points

The fire behavior indicator system “Look Up, Look Down, Look Around” was developed in response to this tragedy fire.

- Using pages 3 and 4 in your IRPG, what indicators are most significant in your area to let you know the fire behavior may become problematic?

The Haines Index, a measure of the atmosphere's effect on a fire's growth potential, was adopted for inclusion on Fire Weather forecasts issued by the National Weather Service.

- Review and discuss the Haines Index information on page 65 in your IRPG.

In his paper “LCES and Other Thoughts”, Paul Gleason writes about kneeling next to one of the Perryville firefighters and of his promise to help end needless fatalities and near misses.

- Review page 7 in your IRPG and discuss how you and your crew establish and maintain LCES.
- Discuss the difference between establishing LCES and maintaining LCES.
- What are common barriers to maintaining LCES?

We honor these firefighters today by learning about the lessons they learned the hard way and by using this tragic event as a tool to keep ourselves and our crews safe on the fireline. Use the following resources:

- Dude Fire Staff Ride
- Fire Investigation Report
- Dude Fire - Fire Weather Behavior
