

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 16, 2015 - 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (68 new fires)
New large incidents:	3
Large fires contained:	5
Uncontained large fires: **	42
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	8
Type 2 IMTs committed:	8

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Sixty-eight fireline management personnel from Australia and New Zealand are assigned to support large fires in the Northwest Area.

Northern California Area (PL 4)

New fires:	17
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

Valley, Sonoma-Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Michael). One mile south of Glenbrook, CA. Timber, brush and tall grass. Active fire behavior with backing and group torching. Numerous structures threatened. Evacuations, road and area closures in effect.

Butte, Amador-El Dorado Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). One mile north of Mokelumne Hill, CA. Timber, chaparral and tall grass. Minimal fire behavior with flanking, backing and smoldering. Numerous structures threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Lumpkin, Butte Unit, Cal Fire. Cal Fire IMT 1 (Derum). Ten miles east of Oroville, CA. Timber. Minimal fire behavior. Numerous structures threatened. Evacuations and road closures in effect.

Gasquet Complex (2 fires), Six Rivers NF. IMT 2 (Young). Thirteen miles northeast of Crescent City, CA. Timber, brush and short grass. Minimal fire behavior with backing, creeping and smoldering. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

River Complex, Shasta-Trinity NF. Three miles southwest of Denny, CA. Timber and brush. Minimal fire behavior with backing, creeping and smoldering. Area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Northwest Area (PL 3)

New fires: 5
New large incidents: 0
Uncontained large fires: 20
Type 1 IMTs committed: 2
Type 2 IMTs committed: 5

Dry Gulch, Baker Unit, ODF. ODF IMT 1 (Smith). Seven miles northwest of Richland, OR. Brush and tall grass. Minimal fire behavior. Numerous structures threatened. Precipitation occurred over the fire area yesterday.

North Star, Colville Agency, BIA. IMT 1 (McGowan). IMT is also managing the Tunk Block fire. Twenty-four miles east of Omak, WA. Timber and brush. Minimal fire behavior. Road and area closures in effect. Precipitation occurred over the fire area yesterday.

Tunk Block, Northeast Region, DNR. Ten miles northeast of Omak, WA. Timber. Minimal fire behavior. Road and area closures in effect.

Okanogan Complex (2 fires), Northeast Region, DNR. IMT 2 (Lietch). Eleven miles northwest of Omak, WA. Timber and brush. Moderate fire behavior with backing, creeping and isolated torching. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Meeks Table, Okanogan-Wenatchee NF. IMT 2 (Gales). Fourteen miles northwest of Naches, WA. Timber and medium logging slash. Moderate fire behavior with backing, creeping and isolated torching. Numerous structures threatened. Road closures in effect. Reduction in acreage due to more accurate mapping.

Kettle Complex (3 fires), Colville NF. IMT 2 (Ciraulo). Fifteen miles northeast of Republic, WA. Timber and light logging slash. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Road, area and trail closures in effect. Reduction in acreage due to more accurate mapping. Precipitation occurred over the fire area yesterday.

Chelan Complex (5 fires), Southeast Region, DNR. IMT 2 (Allbee). Started on BLM land one mile south of Chelan, WA. Timber. Moderate fire behavior with creeping, backing and single tree torching. Road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Wolverine, Okanogan-Wenatchee NF. IMT 2 (Rabe). IMT is also managing the First Creek fire. Three miles northwest of Lucerne, WA. Timber. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Road and trail closures in effect.

First Creek, Okanogan-Wenatchee NF. Eight miles northwest of Chelan, WA. Timber and short grass. Minimal fire behavior.

Carpenter Rd, Spokane Agency, BIA. Five miles south of Fruitland, WA. Timber and short grass. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Road closures in effect. Precipitation occurred over the fire area yesterday.

Canyon Creek Complex, Malheur NF. Two miles south of John Day, OR. Timber and short grass. Minimal fire behavior. Structures threatened. Road, area and trail closures in effect.

Cougar Creek, Yakama Agency, BIA. Six miles northwest of Glenwood, WA. Timber. Minimal fire behavior. Structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

National Creek Complex, Rogue River-Siskiyou NF. Eleven miles southwest of Diamond Lake, OR. Timber. Minimal fire behavior with creeping and smoldering. Road, area and trail closures in effect.

Horsethief Butte, Southeast Region, DNR. Four miles west of Wishram, WA. Short grass. Minimal fire behavior. Last report unless significant activity occurs.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: A broad low pressure trough over the western U.S. will be reinforced by another wet weather system moving in from the Pacific Coast. This will bring additional wetting precipitation to much of the Intermountain West, along with temperatures 15 to 20 degrees below normal, and humidity well-above normal. A cold front associated with the trough will move through the northern and central Rockies with wetting rain and mountain snowfall. Further south, it will be warm and very windy across the high Plains with the frontal passage. Warm temperatures and strong southerly winds will precede the front from the central Plains through the Great Lakes as it approaches the Mississippi Valley today. Breezy conditions are also expected to persist over portions of southern California and the southern Great Basin as conditions begin to dry out. Numerous showers and thunderstorms will result in heavy rainfall over the southeast U.S. today as a tropical wave moves eastward toward the central Gulf Coast.

Escape Routes 2 (LCES)

Operational Engagement Category

Escape Routes are the path the firefighter takes from their current locations, exposed to the danger, to an area free from danger. Notice that escape routes is used instead of escape route(s). Unlike the other components, there always must be more than one escape route available to the firefighter.

Escape routes are probably the most elusive component of LCES. Their effectiveness changes continuously. As the firefighter works along the fire perimeter, fatigue and spatial separation increases the time required to reach the safety zone.

<http://www.wildfirelessons.net/6minutesforsafety> The most common escape route (or part of an escape route) is the fireline. On indirect or parallel fireline, situations become compounded. Unless safety zones have been identified ahead, as well as behind, firefighters retreat may not be possible.

- Have you ever timed an escape route? If not how do you judge its effectiveness?
- Describe a time when you were uncomfortably distant from your escape route.
- Describe a method you have used to communicate an escape route to your crews.
