

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Saturday, September 26, 2015 - 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (74 new fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires: **	5
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	2

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Northern California Area (PL 3)**

New fires:	14
New large incidents:	0
Uncontained large fires:	3
Type 1 IMTs committed:	2

**Valley**, Sonoma-Lake Napa Unit, Cal Fire. Transfer of command from Cal Fire IMT 1 (Michael) back to the local unit will occur today. One mile south of Glenbrook, CA. Timber, chaparral and tall grass. Minimal fire behavior. Numerous structures threatened. Road and area closures in effect.

**Butte**, Amador-El Dorado Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). One mile north of Mokelumne Hill, CA. Timber, chaparral and tall grass. Minimal fire behavior with smoldering.

**River Complex**, Shasta-Trinity NF. Three miles southwest of Denny, CA. Timber. Minimal fire behavior. Area and trail closures in effect.

**Gasquet Complex (2 fires)**, Six Rivers NF. Thirteen miles northeast of Crescent City, CA. Timber. Minimal fire behavior with smoldering. Road, area and trail closures in effect. Last report unless significant activity occurs.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. \*\*\*

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** A weak trough and cold front will slide through the Northwest and northern Rockies. Cooler weather with a small chance of showers will move into the region. Breezy conditions will develop across the High Plains of Montana and Wyoming. Warm and dry weather will remain in place over the remainder of the West. High pressure over the Northeast will keep mild temperatures over most of the eastern U.S. with scattered showers and thunderstorms forming over the Mid-Mississippi and Mid-Atlantic states and over parts of the Southeast.

## WORKING WITH HELICOPTER DROPS

*Aviation Category*

Consider the following questions when you have a helicopter with a bucket working in your area:

If the helicopter is a Type 1 increase the distance of standby place from the drop zone.

Use helicopter drops to knock down or secure a fire area that poses a direct imminent threat to escaping control lines or climbing up ladder fuels.

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- What is the turnaround time for the helicopter?
- Are people on the ground aware of the effects of the helicopter's rotorwash?
- Give feedback to the pilot about drop accuracy. Be honest and constructive.
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
