

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Friday, August 5, 2016 – 0530 MT**  
**National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Light (122 new fires)
New large incidents:	9
Large fires contained:	8
Uncontained large fires:**	30
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	9
Type 2 IMTs committed:	7

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 air tanker and support personnel each from the 153<sup>rd</sup> Airlift Wing, (Wyoming Air National Guard) and the 302<sup>nd</sup> Airlift Wing, (Colorado Springs, Air Force Reserve) have been deployed to Boise, ID in support of wildland fire operations.

One Convair 580 airtanker group from British Columbia has been deployed to Billings, MT in support of wildland fire operations.

**Great Basin Area (PL 4)**

New fires:	10
New large incidents:	3
Uncontained large fires:	7
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

**Pioneer**, Boise NF. IMT 1 (Lund). Five miles north of Idaho City, ID. Timber. Active fire behavior with group torching, spotting and running. Structures threatened. Road, area and trail closures in effect.

**Broad Mouth**, Bear River Area, Utah DOF. Fifteen miles northwest of Tremonton, UT. Chaparral and tall grass. Active fire behavior with spotting and running. Structures threatened. Sage-grouse habitat threatened.

**Cliff Creek**, Bridger-Teton NF. IMT 2 (Bird). Fifteen miles east of Hoback, WY. Timber. Moderate fire behavior with group torching. Structures threatened. Road, area and trail closures in effect.

**Virginia Mountains Complex** (2 fires), Carson City District Office, BLM. IMT 2 (Roide). Forty miles north of Reno, NV. Brush and short grass. Moderate fire behavior with group torching, backing and smoldering. Sage grouse habitat threatened.

\* **Rocky Peak**, Franklin County. Ten miles north of Preston, ID. Brush and short grass. Minimal fire behavior. Residences threatened.

**Poodle**, Winnemucca District, BLM. Twenty miles northwest of Gerlach, NV. Timber and brush. Minimal fire behavior with isolated torching. Sage grouse habitat threatened.

**Comet**, Salmon-Challis NF. Thirteen miles north of Salmon, ID. Timber and short grass. Minimal fire behavior.

**Roaring**, Salmon-Challis NF. Previously reported incident. Thirty-one miles northwest of Salmon, ID. Timber. Active fire behavior with short-range spotting, short crown runs and backing. Trail closures in effect. Last report unless significant activity occurs.

\* **Porcupine**, Manti-Lasal NF. Sixteen miles northeast of Salina, UT. Timber. Moderate fire behavior with isolated torching. Last report unless significant activity occurs.

\* **Outlook**, Uinta/Wasatch-Cache NF. Twenty-five miles south of Mountain View, WY. Timber, heavy logging slash and brush. Moderate fire behavior with torching and creeping. Trail closures in effect. Last report unless significant activity occurs.

**Predictive Services Discussion:** Scattered thunderstorms will continue over the Four Corners region while widely scattered thunderstorms develop in the northern Great Basin and parts of the Northwest. A few thunderstorms could also develop late in the day in the northern Rockies. Showers and thunderstorms will also develop across the Southeast and the Mid-Atlantic and will move through the Midwest along a weak cold front. Temperatures will slowly warm across much of the West with hot conditions continuing in the far southwestern deserts. Hot weather will also continue across the southern Plains and the lower Mississippi Valley. Mild conditions will remain over the central Rockies to the Upper Midwest. The Northeast will be warm. Showers and a few thunderstorms will increase across southern and central Alaska and temperatures will continue to warm slowly.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

## The Mann Gulch Fire - August 5<sup>th</sup>, 1949

**Summary:** Lightning started many fires on the Helena National Forest August 4<sup>th</sup>, 1949 including one near the top of a ridge between Meriwether and Mann Gulches. At 12:55pm August 5<sup>th</sup>, the fire was observed at 6 acres. At 1:30 the call went out for smokejumpers from the Missoula jumpbase. By the time the jump plane flew over at 3pm the fire was 60 acres. The crew jumped and are scattered by a nearby thunder cell.

The crew gathers at the bottom of the gulch up-canyon of the fire. Jumper Foreman goes to scout the fire and meets up with a fire guard working alone near the head of the fire. Observing increased fire activity, the decision is made to start from the toe. While hiking to the toe, the foreman noted that there was fire below them in the gulch and that it had crossed to the other side of the canyon blocking their ability to escape to the river. They reversed direction and headed up toward the NW ridge. The fire is 500 feet behind them crowning in timber and doghair thickets.

The foreman knows that they will not outrun the fire and starts to burn off some grass for a "refuge". He gives the order for his crew to come into the black with him. The foreman stayed in his black and survived the fire passing over. It is not clear how many of the crew heard the orders over the roar of the fire or understood what the foreman was trying to do (burning out was neither taught nor common practice at this time). The crew continued running up the steep slope for the ridge. Two made it to safety in rocks at the top. 5:56pm marks the time on one firefighter's watch that stopped when the 15 Missoula Smokejumpers and one Meriwether Fire Guard were burned over. Only 5 would survive the blow-up. 2 would die from their burns the next day.

**This Day in Wildland Fire History is dedicated to all those at Mann Gulch August 5<sup>th</sup>, 1949.**

Predicted Fire Danger was "low" but readings from a nearby ranger station were RH=22%, fuel sticks = 5%, and wind=16mph indicating more severe fire danger. No weather was recorded at the fire, but steady SW winds were observed at the time of the jump. The Gulch runs SW down to the Missouri River. Also note the thunder cell that was in the area.

- Open your IRPG to page 1. Based on the above information coupled with the increase in fire size, use the Risk Management Process and the map (right) to discuss some of the actions you will take to ensure crew safety: as the FFT2, squad boss, crew boss, etc.

Based on initial aerial size-up, the strategy was to hold the fire on the ridge by anchoring the head of the fire and flanking down both sides to the toe. The fire was noted as "appearing relatively quiet".

- Discuss other tactics that your crew could use if presented with a similar situation. Look at the different options available at different steps of the initial attack.

Though his ability as a firefighter was well respected by his peers, the Foremen was not known by this young group of smokejumpers.

- When we find ourselves in this position (such as a Crew boss assignment) what can we do to create and encourage crew cohesion?
