

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Saturday, August 13, 2016 – 0530 MT**  
**National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Light (86 new fires)
New large incidents:	2
Large fires contained:	5
Uncontained large fires:**	23
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	5
Type 2 IMTs committed:	7

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 air tanker and support personnel each from the 153<sup>rd</sup> Airlift Wing, (Wyoming Air National Guard) and the 302<sup>nd</sup> Airlift Wing, (Colorado Springs, Air Force Reserve) have been deployed to Boise, ID in support of wildland fire operations.

One Convair 580 airtanker group from British Columbia has been deployed to Billings, MT in support of wildland fire operations.

**Southern California Area (PL 3)**

New fires:	19
New large incidents:	0
Uncontained large fires:	4
Type 1 IMTs committed:	3
Type 2 IMTs committed:	2

**Soberanes**, San Benito-Monterey Unit, Cal Fire. Cal Fire IMT 1 (Derum) and IMT 1 (Vontillow). Seven miles northwest of Big Sur, CA. Timber, chaparral and tall grass. Moderate fire behavior with short-range spotting, flanking and backing. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

**Pilot**, San Bernardino, NF. IMT 2 (Wakoski). Three miles west of Lake Arrowhead, CA. Timber, chaparral and brush. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Road, trail and area closures in effect.

**Mineral**, Fresno-Kings Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). Nine miles southwest of Coalinga, CA. Brush and grass. Minimal fire behavior with creeping and smoldering. Road closures in effect.

**Horseshoe**, Inyo NF. IMT 2 (Laeng). Twelve miles southwest of Lone Pine, CA. Timber and brush. Moderate fire behavior. Road closures in effect.

**Predictive Services Discussion:** Rain and thunderstorms will continue across much of the eastern U.S. with heavy rain possible along the western Gulf and over parts of Texas, the Mid-Mississippi Valley and New England. Scattered thunderstorms will also spread along the Rockies Front Range from New Mexico to Colorado. Isolated thunderstorms will develop over the northern Rockies. The western U.S. will remain hot and dry. Mild weather will continue in the Great Lakes region.

## REFUSING RISK

*Operational Engagement Category*

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

- A turn down is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.
- A turn down must be based on an assessment of risks and the ability of an individual or organization to control those risks.
- A situation may be a candidate for a turndown if:
  - There is a violation of safe work practices.
  - Environmental conditions make the work unsafe.
  - The forces lack the necessary qualifications or experience.
  - Defective equipment is being used.
- The following steps will be used when turning down an assignment:
  - The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)
  - Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.
  - If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.
  - The safety hazard should be documented by the submission of a SAFENET or SAFECOM.
- These actions do not stop an operation from being carried out. This protocol is integral to the effective management of risk as it provides timely identification of hazards to the chain of command, raises risk awareness for both leaders and subordinates, and promotes accountability.
