

National Interagency Coordination Center
Incident Management Situation Report
Sunday, August 21, 2016 – 0530 MT
National Preparedness Level 4

National Fire Activity

Initial attack activity:	Light (89 new fires)
New large incidents:	3
Large fires contained:	1
Uncontained large fires:**	23
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	7
Type 2 IMTs committed:	6

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 air tanker and support personnel each from the 153rd Airlift Wing, (Wyoming Air National Guard) and the 302nd Airlift Wing, (Colorado Springs, Air Force Reserve) have been deployed to Boise, ID in support of wildland fire operations.

One Convair 580 airtanker group from British Columbia has been deployed to Pocatello, ID in support of wildland fire operations.

Southern California Area (PL 4)

New fires:	19
New large incidents:	0
Uncontained large fires:	5
Type 1 IMTs committed:	4
Type 2 IMTs committed:	1

Cedar, Sequoia NF. IMT 1 (Minton). Five miles north of Alta Sierra, CA. Timber and chaparral. Active fire behavior with crowning, uphill runs and spotting. Numerous structures threatened. Evacuations, road, trail and area closures in effect.

Chimney, San Luis Obispo Unit, Cal Fire. Cal Fire IMT 1 (Patterson). Fifteen miles west of Paso Robles, CA. Timber and chaparral. Extreme fire behavior. Numerous structures threatened. Road and area closures in effect.

Rey, Los Padres NF. IMT 2 (Mills). Seven miles north of Goleta, CA. Chaparral. Active fire behavior with spotting, uphill runs and single-tree torching. Numerous structures threatened. Evacuations, road, trail and area closures in effect.

Soberanes, San Benito-Monterey Unit, Cal Fire. IMT 1 (von Willow). Seven miles northwest of Big Sur, CA. Timber, chaparral and tall grass. Active fire behavior with backing, flanking and uphill runs. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Blue Cut, San Bernardino NF. IMT 1 (Opliger). Two miles east of Lytle Creek, CA. Chaparral, brush and tall grass. Moderate fire behavior with creeping and smoldering. Numerous structures threatened. Road, area and trail closures in effect.

Great Basin Area (PL 4)

New fires:	11
New large incidents:	2
Uncontained large fires:	7
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

Pioneer, Boise NF. Transfer of command from IMT 1 (Wilkins) to IMT 1 (Lund) will occur today. IMT 2 (Chadwick). Eight miles north of Idaho City, ID. Timber. Active fire behavior with uphill running, spotting and torching. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

* **Sand Ledges**, Central Area, Utah DOF. Twelve miles east of Richfield, UT. Chaparral, brush and short grass. Active fire behavior with running and group torching. Sage grouse habitat threatened. Road closures in effect.

* **Rock Hill**, Winnemucca District, BLM. Fifteen miles southwest of Winnemucca, NV. Closed timber litter, brush and grass. Active fire behavior with isolated torching and short-range spotting. Sage grouse habitat threatened.

Stein, Salmon-Challis NF. IMT 2 (Rosenthal). Fifteen miles north of Salmon, ID. Timber and brush. Moderate fire behavior with creeping and single-tree torching. Residences threatened. Reduction in acreage due to more accurate mapping.

Toponce Creek, Eastern Idaho Area, Idaho Department of Lands. Sixteen miles east of Pocatello, ID. Timber, brush and short grass. Minimal fire activity with smoldering and isolated single-tree torching.

Strawberry, Great Basin NP. Five miles west of Baker, NV. Timber, brush and short grass. Minimal fire behavior. Numerous structures threatened. Sage grouse habitat threatened. Road, trail and area closures in effect.

Izzenhood, Elko District, BLM. Twenty-five miles north of Battle Mountain, NV. Brush and grass. Minimal fire behavior. Sage grouse habitat threatened.

Predictive Services Discussion: High pressure will build across the eastern two-thirds of the nation as a cold front moves toward the Gulf Coast states. Scattered showers and thunderstorms will develop from Texas to the Mid-Atlantic and north to New England. Scattered thunderstorms will form in the afternoon over the Southwest and into southern Utah and Colorado. Isolated thunderstorms are possible along the northern Sierra. Temperatures will remain cool to mild across the Midwest to New England. Warmer conditions will remain over the Southeast and much of the West with hot weather continuing over the desert Southwest and West Coast states.

Chainsaw Operation, Fuel Handling & Safety

Felling Safety Category

Recently, several accidents and near misses involving leakage of chainsaw fuel, vapor lock/tank pressurization, and fuel spray have occurred. Firefighters should remember that fuel leakage, vapor lock/tank pressurization, and potential fuel spray can occur at any time when utilizing chainsaws. Fuel can become pressurized in any container that does not automatically vent pressure and can spray out whenever the pressure is released rapidly.

For firefighters working near ignition sources, having fuel on your clothing or skin presents a significant hazard. Personal Protective Equipment, even flame-resistant clothing, does not provide protection when fuel-soaked PPE ignites.

- **Assume all gas powered equipment and fuel transport containers are pressurized!**
Treat them accordingly when opening, especially when near any potential ignition source.
- **Chainsaw operators: Review reports** associated with recent incidents (Rock Ridge Accident Investigation, Dry Creek Near Miss, Willow Peak Fire Burn Injury Rapid Lesson Sharing and others) to learn how to avoid similar occurrences. <http://www.wildfirelessons.net/home>
- **Chainsaw operators: Watch this short safety video** for information on preventing fuel leakage, identification of potential vapor lock/tank pressurization, mitigation measures for vapor lock/tank pressurization, and reporting procedures for future occurrences.
<https://www.youtube.com/watch?v=RG9I7YkBSOg>
- **Firefighters report future occurrences** of vapor lock/tank pressurization, fuel spray, and fuel leakage through the Safenet System – even if no one is injured! Specific information (make/model/serial number of chainsaw, ambient air temperature, elevation, and fuel used) should be included in Safenet submissions so that further evaluation of potential safety issues can occur. <http://safenet.nifc.gov/>
