

National Interagency Coordination Center
Incident Management Situation Report
Tuesday, August 30, 2016 – 0530 MT
National Preparedness Level 4

National Fire Activity

Initial attack activity:	Light (75 new fires)
New large incidents:	0
Large fires contained:	3
Uncontained large fires:**	24
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	8
Type 2 IMTs committed:	10

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 air tanker and support personnel each from the 153rd Airlift Wing, (Wyoming Air National Guard) and the 302nd Airlift Wing, (Colorado Springs, Air Force Reserve) have been deployed to Boise, ID in support of wildland fire operations.

One Convair 580 airtanker group from both British Columbia and Alberta have been deployed to Pocatello and Twin Falls, Idaho in support of wildland fire operations.

Southern California Area (PL 4)

New fires:	16
New large incidents:	0
Uncontained large fires:	5
Type 1 IMTs committed:	4

Soberanes, San Benito-Monterey Unit, Cal Fire. IMT 1 (Kurth). Seven miles northwest of Big Sur, CA. Timber, chaparral and tall grass. Active fire behavior with running, spotting and flanking. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Chimney, San Luis Obispo Unit, Cal Fire. Cal Fire IMT 1 (Patterson). Fifteen miles west of Paso Robles, CA. Timber and chaparral. Active fire behavior. Structures threatened.

Cedar, Sequoia NF. IMT 1 (Minton). IMT is also managing the Havila fire. Five miles north of Alta Sierra, CA. Timber and chaparral. Active fire behavior with torching and short-range spotting. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Rey, Los Padres NF. IMT 1 (McGowan). Seven miles north of Goleta, CA. Chaparral. Minimal fire behavior. Structures threatened. Road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

Willow, Tuolumne-Calaveras Unit, Cal Fire. Two miles east of San Andreas, CA. Timber, chaparral and short grass. Minimal fire behavior.

Predictive Services Discussion: Scattered thunderstorms will develop across the southern and central Rockies. Scattered thunderstorms will continue across the Gulf Coast to the Mid Atlantic. Scattered showers and a few thunderstorms will linger over central Plains and the Mid-Mississippi Valley. Drizzle and light rain will move into the Northwest Coast. Temperatures will be warm over most of the country except cool over the Rockies, the Northwest and the Upper Midwest and hot in the desert Southwest.

Nomex

Firefighter Health & First Aid

Nomex is the brand name for a **heat and flame-resistant** textile made by the DuPont chemical company and first marketed in 1967. Today, more than three million firefighters and aviation personnel around the world are protected by structure fire turnout gear, wildland fire PPE, and flight suits and jackets made of Nomex.

Nomex IS NOT flame-proof. It burns when you hold a flame to it, but stops burning once the heat source is removed. The thick woven structure of synthetic fibers is a very poor conductor of heat. When exposed to heat, the fibers expand closing the spaces between them insulating the wearer. But to work correctly, Nomex needs care.

Dirty Nomex

- Wash Nomex like normal laundry, but always include a rinse cycle that adequately removes soaps and detergents.
- Nomex garments should never be subjected to strong oxidizing agents such as peroxides or bleaches. These harm the physical strength of the fabric.
- Tumble-dry and remove while slightly damp. Over-drying damages the fabric.

Poison Oak/Ivy/Sumac on Nomex - MTDC researched the laundering of Nomex firefighting clothing that has been contaminated with urushiol oil (what causes the rash) from poison oak/ivy/sumac exposure.

- MTDC recommends that fire clothing contaminated with urushiol oil be cleaned following normal Nomex laundering procedures, with a degreaser such as a detergent or laundry soap, and as soon as possible.
- Extra care should be exercised when handling the contaminated clothing and should be kept separate from unaffected clothing and equipment.
- Put the affected clothing in a marked bag if you are giving it to someone else to wash. Before handling the affected clothing, apply a skin-barrier product such as Ivy Block or Technu.

Fuel Soaked Nomex - Flammable contaminants will reduce the thermal performance of any flame-resistant garment including Nomex.

- Proper and periodic cleaning is essential to maintain thermal protective performance.

Action Item - Nomex is not effective if it is excessively dirty, fuel-soaked, or has holes. Does your Nomex need to be washed, repaired or replaced?
