

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, August 31, 2016 – 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

|                               |                      |
|-------------------------------|----------------------|
| Initial attack activity:      | Light (89 new fires) |
| New large incidents:          | 3                    |
| Large fires contained:        | 2                    |
| Uncontained large fires:**    | 24                   |
| Area Command Teams Committed: | 0                    |
| NIMOs committed:              | 1                    |
| Type 1 IMTs committed:        | 7                    |
| Type 2 IMTs committed:        | 10                   |

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.  
[Link](#) to Geographic Area daily reports.

One MAFFS C-130 air tanker and support personnel each from the 153<sup>rd</sup> Airlift Wing, (Wyoming Air National Guard) and the 302<sup>nd</sup> Airlift Wing, (Colorado Springs, Air Force Reserve) have been deployed to Boise, ID in support of wildland fire operations.

One Convair 580 airtanker group from both British Columbia and Alberta have been deployed to Pocatello and Twin Falls, Idaho in support of wildland fire operations.

\* 1 Hectare = 2.47 Acres

**Predictive Services Discussion:** Scattered thunderstorms will continue across the southern and central Rockies and spread toward the Great Lakes and New England along and ahead of an advancing cold front. Rain will move into the Northwest Coast while isolated thunderstorms form over the higher terrain of the Great Basin and the northern Rockies. Storms associated with a tropical storm will move across Florida and southern Georgia. Temperatures will remain warm in the Southeast, the northern Plains and the Great Basin. Cool to mild conditions will continue over the Rockies, the central Plains and the Midwest. Cool conditions will spread into the Northwest while the desert Southwest remains hot.

## SMOKE EXPOSURE

*Firefighter Health & First Aid*

Exposure to smoke during fire operations can be a significant safety concern. Research has shown that smoke exposure on prescribed fires, especially in the holding and ignition positions, often exceeds that on wildfires. There are many precautions that can be taken to reduce personnel from exposure to smoke.

- **Planning:** Smoke exposure needs to be considered when planning suppression tactics and prescribed fires. Simple actions can mitigate smoke exposures, such as:
  - Altering line locations can have a significant impact on smoke exposure.
  - Placing firelines in areas of lighter fuels or moving lines to roads or other barriers that will require less holding, patrol and mop-up will significantly reduce the smoke exposure to personnel.
  - Use flanking attack as opposed to head attack (where appropriate) in heavy smoke situations.
  - Check fire behavior forecasts for smoke and inversion potential.
  - In heavy smoke, give up acres to gain control.
  
- **Implementation:** Many techniques can help reduce the exposure of personnel to heavy smoke, such as:
  - Rotating people out of the heaviest smoke area may be the single most effective method.
  - Locate camps and incident command posts in areas that are not prone to inversions.
  - Minimize snag falling, consistent with safety concerns, to avoid putting heavy fuels on the ground that will require mop-up.
  - Changing firing patterns and pre-burning (black lining) during less severe conditions can greatly reduce exposure to smoke.
  - The use of retardant, foam or sprinklers can also significantly reduce the workload and exposure time for holding crews.
