

National Interagency Coordination Center
Incident Management Situation Report
Tuesday, December 06, 2016 – 0800 MT
National Preparedness Level 1

National Fire Activity

Initial attack activity:	Light (32 new fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires:**	4
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

This will be the last daily Incident Management Situation Report. This report will be posted every Friday at 0800 Mountain Standard Time unless significant activity occurs.

Southern Area (PL 3)

New fires:	28
New large incidents:	0
Uncontained large fires:	4
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Chimney Tops 2, Great Smoky Mountains NP. IMT 1 (Dueitt). IMT is also managing the Cobbly Nob fire. Five miles south of Gatlinburg, TN. Dormant brush, hardwood slash and hardwood litter. Minimal fire behavior. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Cobbly Nob, Tennessee DOF. Ten miles east of Gatlinburg, Tennessee. Dormant brush, hardwood slash and hardwood litter. Minimal fire behavior. Area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Rock Mountain, Chattahoochee-Oconee NF. Transfer of command from IMT 2 (Bentley) to the local unit will occur today. Two miles south of Tate City, GA. Hardwood litter and timber. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

Tatum Gulf, Georgia Forestry Commission. Eleven miles west of LaFayette, GA. Hardwood litter. No new information. Last report unless new information is received.

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: An Arctic cold front will move south across the Pacific Northwest and Northern Rockies into the Great Basin and Central Plains by late in the day. Temperatures will be noticeably colder and pockets of falling snow along the leading edge of the advancing front are expected. Warm and dry conditions are expected along the Southern Tier from California to the Carolinas. Meanwhile, a warm front will lift northeast from the Ohio River valley into New England by late in the day bringing rain and snow. A low pressure area moving east along the Southern coast of Alaska will bring significant snowfall to the Chugach and Wrangell Mountains and warmer temperatures into the state's interior. Further south across Hawaii, the systems that brought two to three feet of snow to the higher volcanoes over the weekend have been replaced with warmer and wetter systems that may introduce flooding concerns.

Leading Up

Leadership Category

Looking out for our people includes not only those who work for us but also our leaders and peers. Leadership is about influencing others to accomplish tasks that are in the best interest of our organization which often means influencing those above us and leading up. Similarly, we are open to upward leadership – and, in fact, encourage and reward it.

- Fire leaders are expected to lead in many directions, an expectation that increases complexity and risk.
- Summoning the courage needed to intervene and influence peers or leaders above can be difficult, especially if providing unwelcome feedback about behavior or pointing out an alternative to a potentially bad decision.
- In high-risk environments, no one can afford to assume that anyone has all the answers.

To build the kind of healthy and resilient culture required in the wildland fire service, we lead up – holding our leaders accountable, providing unvarnished situational awareness in challenging situations, and offering unbiased and viable alternatives.

Discussion Points

- How can we practice leading up?
- Describe a situation where leading up took place. How was the situation affected?
- Describe a situation where there was opportunity for leading up but it was not done. How was the situation affected?
- Discuss leading “laterally”: influencing peers or those with similar responsibilities.
