

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, February 12, 2016 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity (Feb. 5 – Feb. 11)**

Initial attack activity: Light (459 new fires)

New large incidents: 28

Large fires contained: 19

Uncontained large fires:\*\* 13

Area Command Teams Committed: 0

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Southern Area (PL 2)**

New fires: 376

New large incidents: 25

Uncontained large fires: 10

\* **Big Point**, Ozark & St. Francis National Forests. Eighteen miles southwest of Leslie, AR. Hardwood litter. Active fire behavior. Structures threatened.

\* **FM998**, Texas A & M Forest Service. Started on private land six miles west of Hartley, TX. Tall grass, brush and chaparral. Minimal fire behavior. Structures threatened.

\* **Carol Ranch**, Texas A & M Forest Service. Started on private land six miles west of Truscott, TX. Tall grass. Moderate fire behavior.

\* **Big Bluestem**, Osage Agency, BIA. Ten miles west of Pawhuska, OK. Tall grass and brush. Minimal fire behavior.

\* **CR440**, Texas A & M Forest Service. Started on private land 10 miles southwest of Alice, TX. Brush. Active fire behavior.

\* **Coyote**, Oklahoma DOF. Two miles south of Wardville, OK. Hardwood litter and brush. Extreme fire behavior.

\* **Wood Lake**, National Forests in Florida. Four miles southwest of Sopchoppy, FL. Southern rough. Moderate fire behavior.

\* **Jim Ned Road**, Texas A & M Forest Service. Started on private land six miles southeast of Montague, TX. Short grass and hardwood litter. Moderate fire behavior.

\* **Norwalk**, National Forests in Florida. Two miles north of Salt Springs, FL. Timber and brush. Minimal fire behavior with creeping and smoldering. Structures threatened.

**Oak Grove**, Oklahoma DOF. Two miles southwest of Drumright, OK. Hardwood litter and tall grass. No new information. Last report unless new information is received.

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** A deep trough of low pressure aloft will continue to dominate the weather across the eastern U.S. through the weekend with lake enhanced snowfall across the northeast and an arctic air mass delivering record cold temperatures. Record cold temperatures in the east will dig deep into the south before moderating by the middle of next week with a warmup of 20 to 30 degrees. A shift in the weather pattern will allow a series of weather disturbances to affect the east throughout the period with a wintery mix of freezing precipitation and snow moving through the Mississippi Valley through the Mid-Atlantic before tracking toward the northeast. West of the Rockies, a ridge of high pressure will continue this weekend, but weaken somewhat with a series of weak storms bringing mountain snowfall and lower elevation rain beginning Sunday. By the middle of next week, precipitation may spread as far south as southern California and the Desert Southwest.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## AVIATION WATCH OUTs

*Aviation Category*

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

- Is the flight necessary?
- Who is in charge?
- Are hazards identified and known?

Flight Hazards: Have they been identified and assessed? Have the pilots been informed?

- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
  - Radio Communications
  - Environmental Conditions – weather, visibility, terrain, elevation, temperatures
  - Mission Priorities
  - Successful Mission Completion Probabilities
- Is there a better way to do it?
- Is there pressure to complete a mission at all costs?
- Can you justify your actions?
- Is the mission airspace confined or congested?

Multiple aircraft  
Mixed types of aircraft  
Poor visibility

- Do you have an escape route?
- Are any guidelines being ignored or policies being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?
