

**National Interagency Coordination Center
Incident Management Situation Report
Friday, February 19, 2016 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Feb. 12 – Feb. 18)

Initial attack activity:	Light (377 new fires)
New large incidents:	36
Large fires contained:	28
Uncontained large fires:**	8
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Southern Area (PL 2)

New fires:	315
New large incidents:	30
Uncontained large fires:	8

* **Buffalo**, Oklahoma DOF. Eight miles west of Buffalo, OK. Brush and tall grass. Extreme fire behavior with wind driven runs and spotting. Structures threatened. Evacuations in effect.

* **Pawnee Cove**, Oklahoma DOF. Ten miles east of Terilton, OK. Tall grass and hardwood litter. Extreme fire behavior with wind driven runs. Numerous structures threatened. Evacuations and road closures in effect.

* **Sand Creek**, Oklahoma DOF. Six miles southwest of Henryetta, OK. Hardwood litter and tall grass. Extreme fire behavior with wind driven runs and spotting. Numerous structures threatened.

* **Grand Bature**, Grand Bay National Wildlife Refuge, FWS. Four miles east of Pascagoula, MS. Tall grass, southern rough and timber. Minimal fire behavior with smoldering. Structures threatened. Trail closures in effect.

* **Tree Farm**, Okmulgee Field Office, BIA. Eight miles west of Sapulpa, OK. Hardwood litter. Minimal fire behavior. Structures threatened.

* **Big Bluestem**, Osage Agency, BIA. Ten miles west of Pawhuska, OK. Tall grass and brush. Minimal fire behavior.

* **Gap**, East Central Area, Oklahoma DOF. Thirty miles southeast of McAlester, OK. Hardwood litter and short grass. Moderate fire behavior with backing, creeping and smoldering.

* **Southfork**, Southeast Area, Oklahoma DOF. Seven miles north of Clayton, OK. Hardwood litter. Active fire behavior with running.

* **5 Mile**, Ouachita National Forest, FS. Twelve miles northeast of Broken Bow, OK. Timber and hardwood litter. Moderate fire behavior with backing, creeping and flanking.

* **Fife**, Okmulgee Field Office, BIA. Three miles west of Hanna, OK. Tall grass, hardwood litter and short grass. Minimal fire behavior. Structures threatened.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: A relatively progressive flow across the U.S. this week will provide an active weather pattern with a series of storms progressing from West to East. This will include the northwest quarter of the Nation as well as northern California and the Great Basin. The exception will be across the southwest and Plains regions this weekend where dry weather will continue. This prolonged dry period will transition on Sunday with showers and thunderstorms developing over the central and southern Plains. Showers and thunderstorms will expand along a frontal boundary through the southeast and Mid-Atlantic by the middle of next week before spreading north along the east coast. Late next week, a ridge of high pressure will attempt to strengthen along the Pacific coast with an overall drier and warmer pattern developing.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

HAZARD TREE - RISK MANAGEMENT

Felling Safety Category

● Environment:

- Existing winds and forecast
- Night operations
- Steep slopes
- Diseased or bug-kill areas
- Number, density, and height of hazard trees
- Anticipated burn-down time
- Potential for domino effect to surrounding trees
- Maintain situational awareness and continually reassess hazards

● Hazard Tree Indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung-up

Note: *In addition to suppression and mop-up operations, assess, control, and monitor hazard trees along roads and when selecting break areas or campsites.*

● Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment
- Avoid hazards by designating “No Work Zones” (NWZ) – (flag, sign, and map)
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area
- Post lookouts to help maintain secure area
- Fire proof potential hazard trees to prevent ignition
- Initiate road/traffic control and area closure
- Keep clear of bucket drops near trees/snags
- Establish trigger points for reposition to secure areas in response to high winds
