

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Friday, January 15, 2015 – 0800 MT**  
**National Preparedness Level 1**

**National Fire Activity (Jan. 8 – Jan. 14)**

Initial attack activity:	Light (87 new fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires:**	0
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** Significant precipitation is expected this week over the Pacific Northwest, Great Basin, and northern California, where excessive runoff is anticipated with temperatures above normal. In contrast, very cold conditions are likely this weekend from the Plains through the Great Lakes where lake effect snow will persist this weekend, but diminish through the middle of next week. Elsewhere it will remain unsettled and moist across much of the eastern U.S. including the Mississippi Valley where recent flooding concerns have persisted. The area most favored for precipitation in the east stretches from the Gulf Coastal region through the Mid-Atlantic.

## DRIVING SAFETY

*Vehicles/Roads Category*

**Driving is one of the most hazardous things we do because we literally perform the task hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.**

- To be a safe driver you have to *want* to be one. Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.
- Many things can lure our attention away from our driving such as: fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle and music.
  - ✓ Drive only when you are well rested and alert and avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours.
  - ✓ Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.
  - ✓ Never drive when taking medications that make you drowsy.
  - ✓ Delegate navigation and communication to a passenger or pull over.
  - ✓ By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
  - ✓ Avoid eating or drinking while driving.
  - ✓ When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.
  - ✓ Do not be in a hurry, be patient.
- Safe driving starts with a safe vehicle. Something as simple as under-inflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.
