

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, July 12, 2016 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (129) new fires
New large incidents:	4
Large fires contained:	3
Uncontained large fires:**	10
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

On July 10, two firefighters were fatally injured in a vehicle accident near Denio, NV. The firefighting community extends condolences to family and friends of the deceased.

Rocky Mountain (PL 3)

New fires:	11
New large incidents:	0
Uncontained large fires:	2
Type 2 IMTs Committed:	2

Hayden Pass, Pike & San Isabel NF. IMT 2 (Esperance). Twenty miles southeast of Salida, CO. Timber, heavy logging slash and chaparral. Extreme fire behavior with crowning, running and spotting. Structures threatened. Evacuations, road, area and trail closures in effect.

Cold Springs, Boulder County. IMT 2 (Greer). Two miles northeast of Nederland, CO. Timber. Moderate fire behavior with single tree torching and creeping. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Beaver Creek, Routt NF. Previously reported incident. Twenty-four miles northwest of Walden, CO. Timber and brush. Active fire behavior with short crown runs and short-range spotting. Numerous structures threatened. Evacuations, road, area and trail closures in effect. Last report unless significant activity occurs.

Browning, Crook County. Fifteen miles southwest of Sundance, WY. Timber and brush. Structures threatened. No new information.

Predictive Services Discussion: An upper trough over the Northwest will gradually weaken. Ridging will continue across the southern and eastern states. Warming and drying will begin in the western U.S. with widely scattered showers developing over the northwestern mountains. Scattered showers and thunderstorms will move through the Upper Midwest and the Mid-Mississippi Valley and around the Mid-Atlantic region. Temperatures will begin an upward swing in the Northwest and northern Rockies but will remain mild. Hot conditions will continue in the Southwest and the southern Plains. Warm weather will cover the rest of the nation. In Alaska, scattered showers and thunderstorms will develop in the southeastern corner of the state with isolated thunderstorms forming in the eastern Interior. Temperatures will remain warm across the state.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Static Electricity Hazards

Miscellaneous Category

The National Institute for Occupational Safety and Health (NIOSH) has reported incidents of fire spontaneously igniting when workers attempted to fill portable gasoline cans in the backs of pickup trucks equipped with plastic bed liners, or in cars with carpeted surfaces.

- These fires result from the buildup of static electricity. The insulating effect of the bed liner prevents the static charge generated by the flowing gasoline from grounding. The discharge of this buildup to the grounded nozzle may cause a spark and ignite the gasoline. Both ungrounded metal (most hazardous) and plastic gas containers have been involved in these incidents.
- To prevent this from occurring, NIOSH recommends:
 - Always place the gas can on the ground before refueling.
 - Touch can with gas dispenser nozzle before removing can lid.
 - Keep gas dispenser nozzle in contact with can inlet when filling.
 - Do not re-enter your vehicle when refueling, so as to prevent static discharge from occurring while moving across carpeted surfaces.
