

National Interagency Coordination Center
Incident Management Situation Report
Friday, June 3, 2016 – 0530 MT
National Preparedness Level 1

National Fire Activity

| | |
|-------------------------------|-----------------------|
| Initial attack activity: | Light (127 new fires) |
| New large incidents: | 1 |
| Large fires contained: | 0 |
| Uncontained large fires:** | 5 |
| Area Command Teams Committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 1 |

**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: A stalled front through the eastern and southern U.S. and a slow-moving upper low will keep showers and thunderstorms over most of the southeastern states, especially eastern Texas and the lower Mississippi. Showers will also develop over New England. A cold front moving through the northern Plains will bring scattered showers and thunderstorms to the Upper Midwest. A strong ridge building over the West will produce very hot conditions for most of the region. Excessive heat is expected for the Arizona and southern and central California. In Alaska, scattered showers and a few thunderstorms will continue across the southern third of the state. Temperatures will remain mild for most of the state with the warmest readings in the southwest and central Interior.

INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Fire Communications Category

Every firefighter will be giving and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information:

- Did you use the Incident Response Pocket Guide standards briefing checklist?
- Did they ask questions? Talk about what it is like giving a briefing. Do you get empty stares? What feedback are you looking for to ensure they understand you?
- Did they take notes? What kind of information would you like to see people write down?
- Did they repeat information back? What other ways can you identify that your briefing is registering?
- Did you give all the necessary information? How will you ensure that you covered everything necessary?
 - Task
 - Location
 - Communications
 - Hazards
 - Who, when, etc.
- It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:
 - Did you really listen? What do you do to make yourself pay attention to everything being said?
 - Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?
- You must know the location of the assignment and:
 - What is to be done?
 - Who you are to report to and how often to report.
 - When you are expected to complete the assignment.
 - Hazards.
 - Communication plan frequencies.
 - Weather and fire behavior.
 - Status of adjoining forces.

Have an idea? Have feedback? Share it.
