

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, June 10, 2016 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (122 new fires)
New large incidents:	3
Large fires contained:	2
Uncontained large fires:**	11
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Southwest Area (PL 3)**

New fires:	22
New large incidents:	0
Uncontained large fires:	2
Type 2 IMTs committed:	2

**Tenderfoot**, Phoenix District, BLM. IMT 2 (Sinclair). One mile south of Yarnell, AZ. Brush and tall grass. Extreme fire behavior with running, spotting and uphill runs. Community of Yarnell threatened. Evacuations, road and area closures in effect.

**Juniper**, Tonto NF. IMT 2 (Bales). Ten miles south of Young, AZ. Timber and chaparral. Moderate fire behavior with flanking, wind driven runs, and smoldering. Numerous structures threatened. Area closures in effect.

**38E**, Arizona State Forestry, DOF. Eight miles northeast of Wellton, AZ. Chaparral. Moderate fire behavior with creeping, backing, and smoldering. Structures threatened. Road closures in effect.

**North**, Cibola NF. Twenty-five miles southwest of Magdalena, NM. Timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Road, trail and area closures in effect. Last report unless significant activity occurs.

**Bert**, Kaibab NF. Previously reported incident. Ten miles southeast of Valle, AZ. Hardwood slash, dormant brush, and short grass. Active fire behavior with isolated torching, creeping and smoldering. Residences threatened. Last report unless significant activity occurs.

**Jack**, Coconino NF. Previously reported incident. One mile southeast of Happy Jack, AZ. Timber. Active fire behavior with group torching, spotting and flanking. Last report unless significant activity occurs.

**Predictive Services Discussion:** A broad ridge will cover the eastern two-thirds of the U.S. as an upper low enters the Northwest. Southwesterly flow and cooler air will cover much of the West. Showers and a few thunderstorms will develop over the Northwest and the northern Rockies. Widely scattered afternoon thunderstorms will form across the Southwest and the Great Basin, mainly over higher terrain. A warm front drifting into the Upper Midwest will produce showers and thunderstorms from Minnesota to West Virginia while a stalled front along the Gulf and Southeast coasts continues to produce scattered thunderstorms from Texas to Florida. Temperatures will be considerably cooler across much of the West while the Plains and the Southeast continue to heat up. The Northeast and Great Lakes regions will continue mild. In Alaska, scattered showers and thunderstorms will continue over the west. Temperatures around the state will continue to warm, especially in the central and eastern Interior.

## COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

*Weather / Fire Behavior Category*

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

- Most incidents happen on smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.
- Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.
- Some suppression tools, such as helicopters or air tankers, can adversely affect fire behavior. The blasts of air from low-flying helicopters and air tankers have been known to cause flare-ups.
