

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, June 11, 2016 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (91 new fires)
New large incidents:	5
Large fires contained:	4
Uncontained large fires:**	9
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Southwest Area (PL 3)**

New fires:	18
New large incidents:	3
Uncontained large fires:	2
Type 2 IMTs committed:	2

**Tenderfoot**, Phoenix District, BLM. IMT 2 (Sinclair). One mile south of Yarnell, AZ. Brush and tall grass. Moderate fire behavior with running, spotting, and uphill runs. Numerous structures threatened. Evacuations, road and area closures in effect. Reduction in acreage due to more accurate mapping.

**Juniper**, Tonto NF. IMT 2 (Bales). Ten miles south of Young, AZ. Timber and chaparral. Moderate fire behavior with uphill runs, backing and smoldering. Numerous structures threatened. Area closures in effect.

\* **Escondida**, Socorro District, New Mexico State Forestry. Four miles north of Socorro, NM. Chaparral, brush and tall grass. Extreme fire behavior with crowning, wind driven runs and torching. Structures threatened. Road closures in effect.

**North**, Cibola NF. Twenty-five miles southwest of Magdalena, NM. Timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Road, trail and area closures in effect. Last report unless significant activity occurs.

\* **Balke**, Apache-Sitgreaves NF. Seventeen miles southwest of Alpine, AZ. Timber and medium logging slash. Moderate fire behavior with creeping and flanking. Structures threatened. Last report unless significant activity occurs.

\* **Turkey**, Gila NF. Twenty-six miles north of Silver City, NM. Timber. Minimal fire behavior. Last report unless significant activity occurs.

**McKenna**, Gila NF. Previously reported incident. Twenty miles northeast of Gila, NM. Timber. Minimal fire behavior. Last report unless significant activity occurs.

**Predictive Services Discussion:** An upper level low will move into the Northwest while a strong ridge sets up over the eastern two-thirds of the country. A weak low under the ridge will drift over the southern Plains during the period. Scattered thunderstorms will develop over the Rockies and the Great Basin while showers continue along the Northwest Coast. Scattered afternoon thunderstorms will also form along the Gulf Coast and over parts of New England and the Great Lakes region. Gusty winds will develop over parts of the northern Plains. Much cooler conditions will spread across much of the West with not-as-hot weather in the deep Southwest. Temperatures will soar east of the Rockies with very hot conditions over the northern and central Plains. Mild conditions will remain over New England. In Alaska, scattered showers and thunderstorms will increase across the southwest and move into the central Interior. Isolated thunderstorms are possible in the southeast. Temperatures will cool as precipitation increases in the southern half of the state but warmer conditions will develop to the north.

## Safety Zones 2 (LCES)

*Operational Engagement Category*

Safety Zone(s) are locations where the threatened firefighter may find refuge from the danger. Unfortunately shelter deployment sites have been incorrectly called safety zones. Safety zones should be conceptualized and planned as a location where no shelter is needed. This does not intend for the firefighter to hesitate to deploy their shelter if needed, just if a shelter is deployed the location is not a tree safety zone. Fireline intensity and safety zone topographic location determine safety zone effectiveness.

- How have you determined the distinction between a safety zone and a deployment zone?
- Is refuge in a vehicle, house an acceptable tactic?
- Consider access to the incident. You are often confronted with considerable distances of unburned fuel to cross. How do you manage LCES?
