

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, June 25, 2016 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (123 new fires)
New large incidents:	3
Large fires contained:	1
Uncontained large fires:**	16
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	3

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Southern California Area (PL 4)**

New fires:	18
New large incidents:	1
Uncontained large fires:	5
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

**Erskine**, Central California District, BLM. IMT 1 (Minton). One mile southeast of Lake Isabella, CA. Brush and short grass. Extreme fire behavior with spotting. Numerous residences threatened. Evacuations in effect.

\* **Marina**, Inyo NF. IMT2 (Fogel). One mile northwest of Lee Vining, CA. Timber and brush. Active fire behavior with group torching, short-range spotting, and wind-driven runs. Numerous structures threatened. Evacuations in effect.

**Fish**, Los Angeles County FD. IMT 2 (Wakoski). IMT is also managing the Reservoir fire. Two miles northeast of Azusa, CA. Chaparral, brush, and tall grass. Active fire behavior with uphill runs, backing, and creeping. Numerous structures threatened. Road and trail closures in effect. Evacuations and area closures have been lifted.

**Reservoir**, Angeles NF. Three miles north of Azusa, CA. Chaparral, brush, and short grass. Minimal fire behavior with backing, creeping, and smoldering. Structures threatened. Road and area closures in effect.

**Border 3**, Monte Vista Unit, Cal Fire. Cal Fire IMT 1 (Bravo). Two miles east of Potrero, CA. Chaparral, dormant brush, and tall grass. Minimal fire behavior. Road, area, and trail closures in effect. Evacuations have been lifted.

### **Southwest Area (PL 3)**

New fires: 19  
New large incidents: 1  
Uncontained large fires: 6  
Type 1 IMTs committed: 2

**Cedar**, Fort Apache Agency, BIA. IMT 1 (Pierson). Ten miles south of Show Low, AZ. Timber, brush, and short grass. Moderate fire behavior with isolated torching, flanking, and backing. Numerous structures threatened. Road closures in effect. Evacuations have been lifted. Precipitation occurred over the fire area yesterday.

**Sage-TCA**, Truxton Canyon Agency, BIA. Twenty-eight miles northeast of Peach Springs, AZ. Timber, brush and short grass. Moderate fire behavior with flanking, backing, and creeping. Road closures have been lifted.

**Dog Head**, Cibola NF. Transfer of command from IMT 1 (Day) back to the local unit will occur today. Six miles northwest of Tajique, NM. Timber and medium logging slash. Minimal fire behavior. Road, area, and trail closures in effect.

**Burro**, Apache-Sitgreaves NF. Twelve miles northwest of Mule Creek, NM. Brush and tall grass. Minimal fire behavior.

**\* 104**, Las Vegas District, NM State Forestry. Fifteen miles north of Las Vegas, NM. Timber and short grass. Active fire behavior with isolated torching, wind-driven runs, and creeping. Precipitation occurred over the fire area yesterday.

**Wildcat**, Kaibab NF. Twenty-six miles southeast of Jacob Lake, AZ. Chaparral and short grass. No new information.

**Predictive Services Discussion:** High pressure will return to the Pacific Northwest and allow for warming of temperatures and a cessation to the breezy conditions that occurred over the past couple of days. A weak pulse of monsoonal moisture will move into Arizona and New Mexico, triggering more widely scattered storms across both states. Across the Great Basin and the Northern Rockies, windy conditions will continue as the strong, wet area of low pressure system moves east across central Montana and into North Dakota by evening. By the time this system exits the region, most locations across Montana will have seen wetting rainfall except across the southeastern corner of the state. Wyoming will remain windy and dry. Strong storms will be possible across the central Plains as the rejuvenated, yet still stalled frontal boundary draws in moisture from the Gulf of Mexico. Along the East Coast, expect warm conditions. Just to the west, along the middle section of the Mississippi River, temperatures in the upper 90s along with very high afternoon humidities will create heat indices in the 100-110 degree range. In Alaska, the stalled area of low pressure over the northern Gulf of Alaska will continue to pump moisture across the southern third of the state. A cool Arctic front will drop into the Interior late in the day, producing a chance for late day storms.

## AVIATION COMMUNICATIONS

*Aviation Category*

Discuss the following information in terms of effective communication with aircraft. Involve the pilot in this discussion.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Avoid switching frequencies in the middle of an operational period.
- Discuss Guard frequencies:
  - How they work.
  - When to use them.
  - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to. Do not use local slang.
- Know what you want to say before you key the microphone. Don't think and talk at same time.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling. Use a common frame of reference for the sender and receiver.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
