

National Interagency Coordination Center
Incident Management Situation Report
Friday, March 4, 2016 – 0800 MT
National Preparedness Level 1

National Fire Activity (Feb. 26 – Mar. 3)

Initial attack activity:	Light (751 new fires)
New large incidents:	23
Large fires contained:	18
Uncontained large fires:**	9
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

On February 25th a firefighter with the Los Angeles County Fire Department was fatally injured while assigned to the Mulholland fire on the Santa Monica Mountains National Recreation Area. The firefighting community extends its condolences to the family and friends of the deceased.

Southern Area (PL 2)

New fires:	631
New large incidents:	18
Uncontained large fires:	8

Bass, Osage Agency, BIA. Twenty miles north of Pawhuska, OK. Tall grass. Minimal fire behavior.

* **Ralsten**, Oklahoma DOF. Three miles north of Depew, OK. Hardwood litter and tall grass. Minimal fire behavior. Structures threatened.

Fairfax Landing, Osage Agency, BIA. Nine miles northwest of Fairfax, OK. Hardwood litter. Minimal fire behavior.

* **Lenora**, Oklahoma DOF. One mile northeast of Taloga, OK. Tall grass and timber. Active fire behavior with running.

Tallant, Osage Agency, BIA. Four miles west of Barnsdall, OK. Hardwood litter. Minimal fire behavior.

Barnsdall, Osage Agency, BIA. One mile east of Barnsdall, OK. Hardwood Litter. Minimal fire behavior.

* **RoyAnn**, Wewoka Agency, BIA. Two miles west of Cromwell, OK. Tall grass, hardwood litter and short grass. Minimal fire behavior.

* **Big Ridge**, East Central Area, Oklahoma DOF. Twenty five miles east of McAlester, OK. Hardwood litter. Minimal fire behavior. Last report unless significant activity occurs.

* **Edge Rock**, Oklahoma DOF. Five miles south of Davis, OK. Tall grass and timber. Active fire behavior with uphill runs and group torching. Structures threatened. Evacuations in effect.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: Heavy rainfall and mountain snow are expected over portions of the Intermountain West this weekend and into next week as a tap of Pacific moisture will feed into a series of upper level disturbances. By early next week a strong trough of low pressure over the southwest will take advantage of this moisture tap before it dives into the Rockies where a surge of Gulf moisture will provide strong to severe thunderstorms for the lower Mississippi Valley and Gulf Coastal region. Temperatures across the eastern U.S. are expected to be well-above normal through the period under a ridge of high pressure aloft.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

EXTENDED ATTACK

Operational Engagement Category

After your initial size-up of the fire and/or transfer of command from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the other forces associated with the fire?
- Can you control the fire with the resources available (either on the incident or soon to be on the incident) under expected conditions?
- Have you developed a plan to attack the fire?
 - Direct or indirect
 - Anchor points
 - Escape routes
 - Head or flank attack
 - Priority areas
- Have you communicated this to all personnel assigned to the incident, including new arrivals?
- Can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
 - If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of what resources have been ordered for the fire?
