

National Interagency Coordination Center
Incident Management Situation Report
Monday, September 5, 2016 – 0530 MT
National Preparedness Level 3

National Fire Activity

Initial attack activity:	Light (92 new fires)
New large incidents:	0
Large fires contained:	3
Uncontained large fires:**	16
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7

**Uncontained large fires include only fires being managed under a full suppression strategy.

Great Basin Area (PL 4)

New fires:	12
New large incidents:	0
Uncontained large fires:	3
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Pioneer, Boise NF. IMT 1 (Martin). Eight miles north of Idaho City, ID. Timber. Moderate fire behavior with isolated torching, flanking and backing. Structures threatened. Road, area and trail closures in effect.

West Government Creek, Uinta/Wasatch-Cache NF. Twenty miles southwest of Vernon, UT. Timber. Minimal fire behavior. Structures and sage-grouse habitat threatened.

Berry, Grand Teton NP. Transfer of command from IMT 2 (Roide) back to the local unit will occur today. Nineteen miles northwest of Moran, WY. Timber and short grass. Minimal fire behavior. Structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

Tie, Caribou-Targhee NF. Transfer of command from IMT 2 (Bird) back to the local unit will occur tomorrow. Ten miles southwest of Victor, ID. Timber and brush. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

New fires:	5
New large incidents:	0
Uncontained large fires:	4
Type 1 IMTs Committed:	1
Type 2 IMTs Committed:	2

Copper King, Lolo NF. Transfer of command from IMT 1 (Poncin) to IMT 2 (Staats) will occur today. Seven miles east of Thompson Falls, MT. Timber. Minimal fire behavior. Residences threatened. Evacuations, road, area and trail closures in effect.

Maple, Yellowstone NP. IMT 2 (Hutton). Four miles northeast of West Yellowstone, MT. Timber and grass. Minimal fire behavior. Structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Griffin Gulch, Miles City Field Office, BLM. Started on FS land 45 miles southwest of Broadus, MT. Timber. Minimal fire behavior. Structures threatened. Road closures have been lifted.

Rattlesnake, Central Land Office, Montana DNR. Started on private land five miles northwest of Canyon Creek, MT. Timber and short grass. Minimal fire behavior. Road and area closures in effect.

Clear Creek, Flathead Agency, BIA. Thirteen miles southeast of Plains, MT. Timber, brush and tall grass. Minimal fire behavior. Residences threatened.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: Scattered rain and snow showers in the higher mountains will develop across the northern Rockies. Scattered showers and a few thunderstorms will move into the northern Plains and Upper Midwest. Afternoon thunderstorms will continue along the Gulf Coast. Cool weather will continue across the northwestern quarter of the U.S., while mild conditions linger over the Northeast. Warm weather will persist in the South and spread into the Plains and mid-Mississippi Valley. Temperatures will moderate in the desert Southwest.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

SAFETY ZONES 1 (LCES)

Operational Engagement Category

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire.

- What is the difference between a safety zone and a deployment site?
 - The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.
- How do you identify a good safety zone?
 - Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
 - The best locations are usually "in the black;" those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.
 - Location is scouted and marked well for visibility at all times.
 - Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
 - For radiant heat only, the distance separation between the firefighter and the flames must be at least four times the maximum flame height. This distance must be maintained on all sides, if the fire has ability to burn completely around the safety zone. Convective heat from wind and/or terrain influences will increase this distance requirement.
 - Take advantage of heat barriers such as lee side of ridges, large rocks, or solid structures.
- What should you avoid in selecting a safety zone?
 - Avoid locations that are downwind from the fire.
 - Avoid locations that are in chimneys, saddles, or narrow canyons.
 - Avoid locations that require a steep uphill escape route.
 -
