

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, September 25, 2016 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (43 new fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires:**	5
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. \*\*\*

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** High pressure will dominate the western U.S. as a cold front moves across the Plains. Strong and gusty offshore winds will affect the Southern California coast and north winds will develop across Northern California. Scattered showers and thunderstorms will develop along the front from West Texas to the Upper Midwest. Scattered showers and thunderstorms will also develop along the Gulf and Southeast Coasts. Cool weather will settle across the Rockies, the Plains and New England. Warm conditions will continue over the South and across the West Coast.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## TAKING A NAP NEAR THE FIRELINE

*Operational Engagement Category*

Firefighting is often exhausting work and firefighters can find themselves needing to sleep while on the fireline. Before pausing to rest, firefighters must weigh the following considerations:

- Are lookouts posted? Discuss who that lookout can be. Can the lookout on the knob across the draw watch over you or does it need to be your partner on the fireline alternating rest times?
- Is the area free of hazards? (Falling snags or rolling materials) Discuss what you need to do to create a safe resting area.
- Are you still within agency work and rest guidelines? Review what these guidelines are.
- Does your crew need a break? Have they been pushed too hard? Talk about situations where you need to simply take yourself and/or your crew off the fire for uninterrupted rest.
- To reduce risks:
  - Keep lookouts posted; rotate lookouts.
  - Communicate crew conditions and status to supervisor or chain-of-command contact. Have firefighters discuss ways that they find to rest on the fireline and suggestions for methods to alternate shifts for more effective firefighting.

**Have an idea? Have feedback? Share it.**
