

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, August 5, 2017 – 0530 MT
National Preparedness Level 4**

National Fire Activity

Initial attack activity:	Light (99) new fires
New large incidents:	8
Large fires contained:	1
Uncontained large fires:**	30
Area Command Teams Committed:	1
NIMOs committed:	2
Type 1 IMTs committed:	5
Type 2 IMTs committed:	17

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 airtanker and support personnel each from the 152 Airlift Wing, (Nevada Air National Guard), 153rd Airlift Wing, (Wyoming Air National Guard) and the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) have been deployed to Fresno, CA in support of wildland fire operations.

Northern Rockies Area (PL 4)

New fires:	7
New large incidents:	0
Uncontained large fires:	7
Area Command teams committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7

Area Command Team (Stutler) is managing large fires on the Lolo National Forest and Flathead Reservation.

Rice Ridge, Lolo NF. IMT 2 (Goldman) Six miles north of Seeley Lake, MT. Timber. Active fire behavior with group torching and uphill runs. Structures threatened. Trail and area closures in effect.

Sunrise, Lolo NF. IMT 2 (Pearson). IMT is also managing the Burdette fire. Eleven miles east of Superior, MT. Timber and brush. Active fire behavior with wind-driven runs, long-range spotting and single-tree torching. Structures threatened. Evacuations, road, trail and area closures in effect.

Burdette, Lolo NF. Thirteen miles southeast of Tarkio, MT. Timber. Moderate fire behavior with isolated torching, short-range spotting and creeping.

Sapphire Complex (3 fires), Lolo NF. IMT 2 (Thompson). Fifteen miles southeast of Clinton, MT. Timber. No new information received.

Lolo Peak, Lolo NF. Transfer of command from IMT 1 (Poncin) to IMT 1 (Livingston) will occur today. Ten miles southwest of Lolo, MT. Timber. Active fire behavior with group torching and flanking. Road, trail and area closures in effect.

Liberty, Flathead Agency, BIA. IMT 1 (McGowan). Seventeen miles southeast of Arlee, MT. Timber. Active fire behavior with short crown runs, flanking and isolated torching. Road, trail and area closures in effect.

Meyers, Beaverhead - Deerlodge NF. IMT 2 (Almas). Twenty-five miles southwest of Philipsburg, MT. Timber. Active fire behavior with torching, backing and short crown runs. Residences threatened. Evacuations, road and area closures in effect.

Park Creek, Helena-Lewis and Clark NF. Transfer of Command from IMT 2 (Hutton) to IMT 2 (Zombro) will occur tomorrow. IMT is also managing the Arrastra Creek fire. Two miles north of Lincoln, MT. Timber. Minimal fire behavior with flanking, backing and single-tree torching. Structures threatened. Area closures in effect.

Arrastra Creek, Helena-Lewis and Clark NF. Six miles northwest of Lincoln, MT. Timber. Minimal fire behavior with flanking, backing and single-tree torching. Structures threatened. Area closures in effect.

Hanover, Nez Perce – Clearwater NF. IMT 2 (Leach) Four miles northeast of Florence, ID. Timber, brush and grass. Moderate fire behavior with uphill runs, torching and long-range spotting. Structures threatened. Road, trail and area closures in effect. Reduction in acreage due to more accurate mapping.

Lodgepole Complex, Miles City Field Office, BLM. Fifty-two miles northwest of Jordan, MT. Timber, brush and short grass. Minimal fire behavior. Sage-grouse habitat threatened.

Lightning, Fort Peck Agency, BIA. Twenty-eight miles northwest of Wolfpoint, MT. Short grass. Last report unless new information is received.

Predictive Services Discussion: Critical fire weather conditions are possible across Northern California, Oregon, and Nevada as the upper level low pressure area located off the California Coast pumps stronger surges of monsoonal moisture northward into the area. With a favorable burn environment, lightning efficiency will be high. By late afternoon, the convection will spread into the Northern Rockies and the eastern portions of the Pacific Northwest. Further east, another back door cold front will move southwest into the Great Plains from Canada. There is a chance that it could cross over the Continental Divide putting western Montana and northern Idaho under an easterly flow. Looking elsewhere, a stationary front will remain stalled along the Gulf of Mexico coastline and will keep the area under a stormy regime.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

The Mann Gulch Fire - August 5th, 1949

Summary: Lightning started many fires on the Helena National Forest August 4th, 1949 including one near the top of a ridge between Meriwether and Mann Gulches. At 12:55pm August 5th, the fire was observed at 6 acres. At 1:30 the call went out for smokejumpers from the Missoula jumpbase. By the time the jump plane flew over at 3pm the fire was 60 acres. The crew jumped and are scattered by a nearby thunder cell.

The crew gathers at the bottom of the gulch up-canyon of the fire. Jumper Foreman goes to scout the fire and meets up with a fire guard working alone near the head of the fire. Observing increased fire activity, the decision is made to start from the toe. While hiking to the toe, the foreman noted that there was fire below them in the gulch and that it had crossed to the other side of the canyon blocking their ability to escape to the river. They reversed direction and headed up toward the NW ridge. The fire is 500 feet behind them crowning in timber and doghair thickets.

The foreman knows that they will not outrun the fire and starts to burn off some grass for a "refuge". He gives the order for his crew to come into the black with him. The foreman stayed in his black and survived the fire passing over. It is not clear how many of the crew heard the orders over the roar of the fire or understood what the foreman was trying to do (burning out was neither taught nor common practice at this time). The crew continued running up the steep slope for the ridge. Two made it to safety in rocks at the top. 5:56pm marks the time on one firefighter's watch that stopped when the 15 Missoula Smokejumpers and one Meriwether Fire Guard were burned over. Only 5 would survive the blow-up. 2 would die from their burns the next day.

This Day in Wildland Fire History is dedicated to all those at Mann Gulch August 5th, 1949.

Predicted Fire Danger was "low" but readings from a nearby ranger station were RH=22%, fuel sticks = 5%, and wind=16mph indicating more severe fire danger. No weather was recorded at the fire, but steady SW winds were observed at the time of the jump. The Gulch runs SW down to the Missouri River. Also note the thunder cell that was in the area.

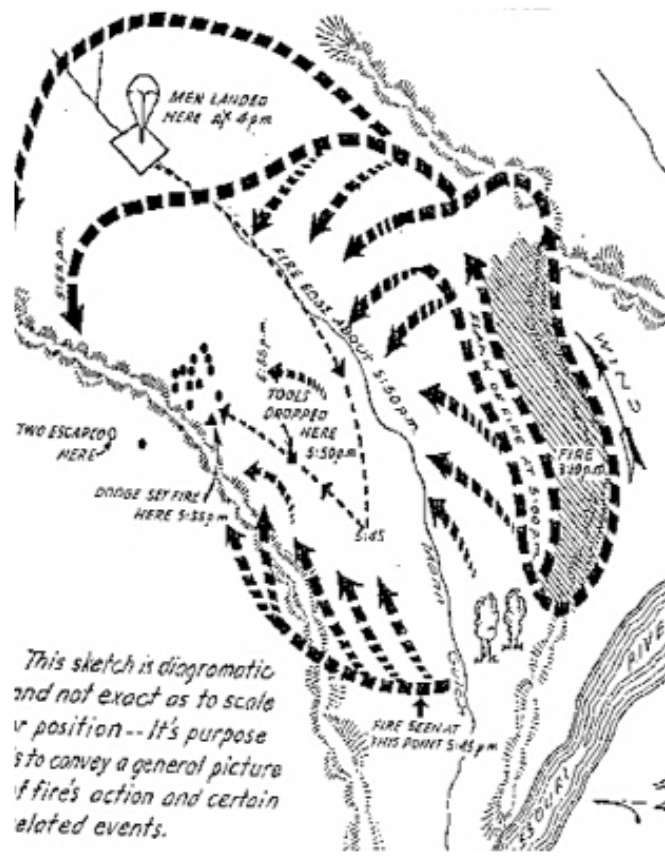

- ◆ Open your IRPG to page 1. Based on the above information coupled with the increase in fire size, use the Risk Management Process and the map (right) to discuss some of the actions you will take to ensure crew safety: as the FFT2, squad boss, crew boss, etc.

Based on initial aerial size-up, the strategy was to hold the fire on the ridge by anchoring the head of the fire and flanking down both sides to the toe. The fire was noted as "appearing relatively quiet".

- ◆ Discuss other tactics that your crew could use if presented with a similar situation. Look at the different options available at different steps of the initial attack.

Though his ability as a firefighter was well respected by his peers, the Foreman was not known by this young group of smokejumpers.

- ◆ When we find ourselves in this position (such as a Crew boss assignment) what can we do to create and encourage crew cohesion?

Have an idea? Have feedback? Share it.
