Predictive Services Discussion: Critical fire weather conditions are possible across eastern Montana, western North Dakota, and northeastern Wyoming as a strengthening cold front moves east across the region. Scattered dry and wet storms are expected to develop along the leading edge of the front. A strong wind shift is expected along with a brief period of post frontal gusty winds. Convection associated with the front will extend as far south as the Texas Panhandle where it will draw in monsoonal moisture. West of the front from western Montana to the Coast and south to Mexico an approaching weak ridge of high pressure will bring a continuance of warm and dry conditions. A dry, breezy northwesterly flow is expected across the eastern Great Plains as a cold front moves out of the region toward the East Coast for the evening and overnight hours. Expect wet, stormy conditions from the late afternoon hours into the overnight period.

FIGHT FIRE AGGRESSIVELY, BUT PROVIDE FOR SAFETY FIRST

Operational Engagement Category

Standard Fire Order #10 must be taken into account at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

- Is the suppression method adequate? Ask yourselves, are we making progress? Are we beating our heads against a wall? Is there a better way to get this done? Give examples when you have had to change your suppression method.
- Are there adequate resources and time for effective suppression? Ask yourselves, do we need to retreat and reevaluate? Talk about times when you have realized you weren't getting anywhere and needed to retreat and start managing firefighters and placing orders.
- Are lookouts posted? Discuss when you post lookouts, who you would choose to be a lookout, and where they should be located.
- Are communications prompt with crews and other resources? Review the importance of good communications on the fireline.
- Have escape routes and safety zones been established? Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.
- Do you feel comfortable with your assignment? Discuss the situation check. Remind firefighters that every individual has the right to question an assignment.
- To reduce the risks:
 - Post lookouts.
 - Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
 - Do you have established trigger points?
