

National Interagency Coordination Center
Incident Management Situation Report
Friday, December 08, 2017 – 0800 MT
National Preparedness Level 1

National Fire Activity

Initial attack activity:	Light (65) new fires
New large incidents:	4
Large fires contained:	3
Uncontained large fires:**	7
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southern California Area (PL 4)

New fires:	19
New large incidents:	3
Uncontained large fires:	6
Type 1 IMTs committed	5

Thomas, Ventura County Fire Department. Unified command between Cal Fire IMT 1 (Derum) and IMT 1 (J. Kurth). Seven miles east of Ojai, CA. Chaparral, and brush. Extreme fire behavior with running and long-range spotting. Numerous residences threatened. Evacuations, road and area closures in effect.

Creek, Los Angeles County Fire Department. Cal Fire IMT 1 (Bravo). Four miles east of Sylmar, CA. Chaparral, brush and tall grass. Extreme fire behavior with running and long-range spotting. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Rye, Los Angeles County Fire Department. Cal Fire IMT 1 (Estes). Four miles northwest of Santa Clarita, CA. Tall grass, chaparral and brush. Minimal fire behavior with smoldering. Numerous structures threatened.

* **Lilac 5**, Monte Vista Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). One mile east of Bonsall, CA. Chaparral, brush and tall grass. Extreme fire behavior with running and long-range spotting. Numerous residences threatened. Evacuations and road closures in effect.

* **Skirball**, Los Angeles City Fire Department. One mile south of Bel Air, CA. Brush and tall grass. Extreme fire behavior with running and spotting. Numerous residences threatened. Evacuations, road and area closures in effect.

* **Liberty**, Riverside Unit, Cal Fire. Four miles northeast of Murrieta, CA. Tall grass and brush. Extreme fire behavior. Numerous structures threatened. Evacuations in effect.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: High pressure will continue to dominate the western U.S. while cold fronts move through the eastern and Midwestern states. Offshore winds and low humidity along the southern coast of California and into the deserts of far southwestern Arizona will continue through Friday. Wind speeds will be lower but will still reach critical levels in many areas. Elsewhere across the western and central U.S. dry and mostly sunny conditions will prevail. A front moving through the Southeast will bring a mix of rain and thunderstorms from the eastern Gulf states to the Mid-Atlantic region with a wintery mix along the Appalachians into northern Georgia. In the Midwest, an approaching arctic front will bring snow and very cold conditions to the Great Lakes region. Temperatures around the country will be cold across the Great Lakes region, warm across California, the southwest deserts, and Florida, and mild elsewhere.

INITIAL ATTACK FIRE SIZEUP/SAFETY

Operational Engagement Category

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

- Use the following reporting factors for size-up and reference local fire size-up cards. Discuss others that may be used.
 - Fire name and location
 - Terrain (slope, aspect, elevation) and position of fire on the slope
 - Size of fire
 - Fuel type, anticipated control problems, and spread potential
 - Values threatened
 - Weather conditions (wind speed and direction)
 - Fire behavior
 - Resources on the fire and those needed
 - Estimated containment and control times
 - Cause (known, suspected, under investigation)
- After your initial size-up of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.
 - Have you sized up the fire and relayed the information to dispatch?
 - Is the observed fire weather consistent with the forecast?
 - Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
 - Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
 - Are lookouts in place or can you see all of the fire area?
 - Can you communicate with everyone on the fire and with dispatch?
 - Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
 - Are safety and the standard fire orders being followed and/or mitigated?
 - Do you have a complete list of what resources have been ordered for the fire?
 - Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
