

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Sunday, December 10, 2017 – 0800 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (32) new fires
New large incidents:	0
Large fires contained:	2
Uncontained large fires:**	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	0

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern California Area (PL 4)**

New fires:	12
New large incidents:	0
Uncontained large fires:	5
Type 1 IMTs committed	5

**Thomas**, Ventura County Fire Department. Unified command between Cal Fire IMT 1 (Derum) and IMT 1 (J. Kurth). Seven miles east of Ojai, CA. Chaparral, and brush. Extreme fire behavior with wind driven runs, long-range spotting and running. Numerous structures threatened. Evacuations, road and area closures in effect.

**Creek**, Los Angeles County Fire Department. Cal Fire IMT 1 (Bravo). Four miles east of Sylmar, CA. Chaparral, brush and tall grass. Minimal fire behavior with smoldering. Numerous structures threatened. Road and trail closures in effect.

**Rye**, Los Angeles County Fire Department. Cal Fire IMT 1 (Estes). Four miles northwest of Santa Clarita, CA. Tall grass, chaparral and brush. Minimal fire behavior with smoldering. Numerous structures threatened.

**Lilac 5**, Monte Vista Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). One mile east of Bonsall, CA. Chaparral, brush and tall grass. Minimal fire behavior with smoldering. Numerous structures threatened. Evacuations, road and area closures in effect.

**Skirball**, Los Angeles City Fire Department. One mile south of Bel Air, CA. Brush and tall grass. Minimal fire behavior with smoldering. Structures threatened. Road closures in effect. Reduction in acreage due to more accurate mapping.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** Dry and sunny conditions will continue across the West as the high pressure ridge remains firmly entrenched over areas along and west of the Continental Divide. Temperatures in the middle and upper elevations and along the coast will be well above normal while valleys and basins across the interior will remain under a multi-day temperature inversion. Areas of dense fog and/or low clouds are expected across the lower elevations in the Northwest. East of the Divide, a very large and cold upper level trough will continue to produce below average conditions. Precipitation will be limited mainly to the Great Lakes region. In Alaska, a strong and moist southerly flow will continue to produce ample snow in the coastal ranges especially in the Chugach.

## FIRE NOT SCOUTED AND SIZED UP

*Operational Engagement Category*

Watchout Situation #1 comes up during initial attack and **every time** resources arrive at a fire.

- Before taking action on the fire, the following considerations must be addressed:
  - Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
  - Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
  - Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
  - Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
  - Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)
  - Are there aerial resources that can act as lookouts?
- Continued...
  - Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
  - Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
  - Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)
- To reduce the risks:
  - Post lookouts until the fire is sized up and escape routes and safety zones are established.
  - Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
