

National Interagency Coordination Center
Incident Management Situation Report
Friday, February 24, 2017 – 0800 MT
National Preparedness Level 1

National Fire Activity (Feb. 17 – Feb. 23)

| | |
|-------------------------------|-----------------------|
| Initial attack activity: | Light (670 new fires) |
| New large incidents: | 24 |
| Large fires contained: | 22 |
| Uncontained large fires:** | 11 |
| Area Command Teams Committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 0 |

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

| | |
|--------------------------|-----|
| New fires: | 617 |
| New large incidents: | 20 |
| Uncontained large fires: | 11 |

* **Litt Ranch**, Texas A & M Forest Service. Started on private land one mile northeast of Boys Ranch, TX. Tall grass. Extreme fire behavior. Numerous structures threatened.

* **2 Mile Lane**, Oklahoma DOF. Three miles northeast of McAlester, OK. Timber and short grass. Extreme fire behavior with wind driven runs. Structures threatened. Road closures in effect.

* **141st**, Oklahoma DOF. Four miles west of Coweta, OK. Tall grass and brush. Moderate fire behavior with flanking. Numerous residences threatened.

* **Parker Hollow #1**, Kentucky DOF. Started on private land one mile west of Carter, KY. Hardwood litter and grass. Active fire behavior with uphill runs and creeping. Structures threatened.

* **Cold Mountain**, National Forests in North Carolina. Nine miles southeast of Waynesville, NC. Hardwood litter, closed timber litter and short grass. Minimal fire behavior with smoldering. Area and trail closures in effect.

Ball Diamond, Northeast Area, Oklahoma DOF. Eight miles southwest of Tahlequah, OK. Hardwood litter. No new information. Last report unless new information is received.

Talala, Central and Western, Oklahoma DOF. Four miles west of Talala, OK. Tall grass and brush. No new information. Last report unless new information is received.

Strawberry Hollow, Northeast Area, Oklahoma DOF. Four miles northeast of Rolland, OK. Tall grass and brush. No new information. Last report unless new information is received.

Badger McCoy, Northeast Area, Oklahoma DOF. Two miles north of Sallisaw, OK. Tall grass. No new information. Last report unless new information is received.

Porum, East Central Area, Oklahoma DOF. Six miles northeast of Porum, OK. Timber. No new information. Last report unless new information is received.

Eagle Pass, Northeast Area, Oklahoma DOF. Nine miles southeast of Stillwell, OK. Timber. No new information. Last report unless new information is received.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***

Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: Critical fire weather conditions are expected Friday across portions of the Southern Rocky Mountain Front from Southeastern Colorado south to the Mexican border as strong downsloping winds and resulting low humidities interact with the dried, cured fine fuels. Following a late winter storm this weekend, the West will begin to come under the influence of high pressure moving on shore from the Pacific Ocean that should produce a drying and warming trend by mid-week. The strengthening ridge of high pressure to the west will strengthen a trough of low pressure over the Great Plains producing a cooling trend that might also bring snow to the Great Lakes region by mid-week. The strengthening trough of low pressure will strengthen a stalled front that will be draped across the Mid-Atlantic States and Southeast for most of the week. Most drought-starved areas across the southeast should receive several rounds of moisture from the front except possibly Florida. In Alaska, snow is expected in the interior and along the coast this weekend. Following that a cool, but dry ridge of high pressure will move over the state and linger for most of the week.

Roadside Incident Response

Vehicles/Roads Category

Nationally, the number of injuries and fatalities among emergency responders who are responding to roadside incidents is increasing at an increasing rate. Although most wildland fires occur in remote areas, there are situations where wildland fire personnel are responding to fires along rural country roads, jeep roads, or major highways; the risk still exists for our firefighters. Below is a checklist of considerations that should be utilized when responding to fires and other incidents along roadsides:

● Considerations

- Firefighter and public safety will always be the number one priority.
- Utilize L.C.E.S. in all incident activities.
- Personal Protective Equipment will be used on all incidents.

● Upon Arrival at the Scene

Size up incident- see Incident Response Pocket Guide

- What has happened?
- What is happening?
- What will or could happen?
- Is this a HazMat situation?

● Risk Management Process-

- Decision Point, Go No Go. See the Incident Response Pocket Guide, page 1

● Tactical Considerations

- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway whenever possible to avoid traffic congestion.
- Personnel do not exit the fire apparatus until instructed to do so by the module leader.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.
- Post a lookout to watch for and control oncoming traffic.
- Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
- Utilize and place road flares or other traffic warning signs whenever possible
- If equipment needs to be removed from the traffic side of the apparatus, one person

will retrieve the equipment and a lookout will watch for oncoming traffic.

- Engine operators will operate pumps from the non-traffic side or from the cab of the apparatus when possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
- During night operations utilize reflective clothing, vests and other safety equipment as necessary.
- All emergency responses on roadways will be concluded as quickly as possible to reduce personnel exposure.
- Cancel or demob unnecessary apparatus as soon as possible.

• *** Each agency emergency vehicle operator will follow their particular state laws and agency policies governing the operations of emergency vehicles.*
