

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, July 11, 2017 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

Initial attack activity:	Moderate (225) new fires
New large incidents:	11
Large fires contained:	15
Uncontained large fires:**	53
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	7
Type 2 IMTs committed:	15

\*\*Uncontained large fires only include fires being managed under a full suppression strategy.

**Great Basin (PL 4)**

New fires:	37
New large incidents:	2
Uncontained large fires:	15
Type 2 IMTs committed:	4

\* **Farad**, Humboldt-Toiyabe NF. Ten miles northeast of Truckee, CA. Timber. Active fire behavior with uphill runs and spotting. Structures threatened.

**Rooster Combs**, Northern Region, Nevada Division of Forestry. Twenty-five miles north of Battle Mountain, NV. Brush and tall grass. Extreme fire behavior with wind driven runs and flanking. Structures threatened. Sage-grouse habitat threatened.

**Draw**, Carson City District Office, BLM. IMT 2 (Rohrer). Fifty miles east of Fallon, NV. Closed timber litter, brush and short brush. Active fire behavior with running, spotting and torching. Structures threatened. Evacuations and road closures in effect. Energy infrastructure threatened. Sage-grouse habitat threatened.

\* **Meadow Creek**, Twin Falls District, BLM. Eight miles east of Sublet, ID. Hardwood litter, brush and short grass. Extreme fire behavior with running. Sage-grouse habitat threatened.

**Antelope**, Twin Falls District, BLM. Four miles west of Shoshone, ID. Brush and short grass. Extreme fire behavior with wind driven runs. Road closures in effect. Sage-grouse habitat threatened.

**Tabor Flat**, Northern Region, Nevada DOF. IMT 2 (Goff). Sixteen miles west of Wells, NV. Brush and tall grass. Extreme fire behavior with flanking and wind driven runs. Residences threatened.

**Aspen**, Truckee Meadows Fire Protection District. IMT 2 (Chadwick). Eighteen miles northeast of Reno, NV. Timber, brush and short grass. Active fire behavior with uphill runs, single tree torching and smoldering. Numerous structures threatened. Sage-grouse habitat threatened.

**Brianhead**, Southwest Area, Utah DOF. IMT 2 (DeMasters). One mile north of Brian Head, UT. Timber and hardwood litter. Minimal fire behavior. Numerous residences threatened. Evacuations, road, area and trail closures in effect. Sage-grouse habitat threatened. Precipitation occurred over the fire area yesterday.

**Potosi**, Humboldt-Toiyabe NF. Twenty-eight miles southwest of Las Vegas, NV. Brush, tall grass and timber. Minimal fire behavior. Structures threatened.

**King Valley**, Winnemucca District Office, BLM. Twenty-two miles northwest of Orvada, NV. Brush and short grass. Minimal fire behavior. Structures threatened. Sage-grouse habitat threatened.

**Tweeds South**, Arizona Strip Field Office, BLM. Nineteen miles southeast of Mesquite, NV. Short grass. Minimal fire behavior.

**Dry Gulch**, Elko District Office, BLM. Twenty-three miles southeast of Jackpot, NV. Brush, tall grass and timber. Minimal fire behavior.

**Holman**, Central Area, Utah DOF. Started on private land 20 miles northeast of Delta, UT. Brush and tall grass. Minimal fire behavior.

**Tweeds North**, Arizona Strip Field Office, BLM. Eighteen miles southeast of Mesquite, NV. Short grass. Minimal fire behavior.

**Limerick**, Winnemucca District, BLM. Twelve miles northeast of Lovelock, NV. Timber, brush, and tall grass. Minimal fire behavior. Residences threatened. Sage-grouse habitat threatened.

**Predictive Services Discussion:** Scattered mostly wet convection will continue across the West as significant surges of monsoonal moisture continue to rotate around the high pressure area that remains centered over the Four Corners Region. Temperatures across the West will remain 10-15 degrees above normal. The warm conditions will extend into Alaska where it will be drier. Shower activity will be limited to mainly coastal areas along the Alaskan Gulf Coast. Across the East, cool and moist conditions are expected as a cold front moves across the eastern half of the nation.

## WILDLAND/URBAN INTERFACE WATCHOUTS

*Operational Engagement Category*

The primary consideration is to first assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structures. The first step in conducting a safe operation is to assess whether the firefighting operations can be conducted safely.

- Consider the Wildland/Urban Interface Watchouts in completing a risk analysis for the urban interface area to be protected. Remember there are three categories of structures:
  - Those that are not threatened.
  - Those that are threatened.
  - Those that have already been lost or too dangerous to protect.
- Wildland/Urban Interface Watchouts:
  - Poor access and narrow, one-way roads. A rapidly spreading fire could trap apparatus and personnel before they can turn around or move away from the flames and smoke.
  - Observe bridge limits. Exceeding bridge limits could lead to bridge failure with a resultant blocking of ingress/egress routes that could result in the loss of an escape route or loss of equipment.
  - Inadequate water supply. Without a reserve supply of water, the fire can overtake an area before the fuels can be cleared away.
  - Natural fuels are located 30 feet or closer to structures on level ground. Remember structures on slopes require greater clearance. Structures are located on canyon slopes or chimneys on slopes of 30% or more with continuous, flashy fuels. The resulting rate of spread of any fire in this terrain can quickly extend beyond control.
- Extreme fire behavior: Situations involving crowning, large flame heights and erratic fire behavior can extend in an unpredictable manner beyond the control of any number of personnel. Strong winds of 25+ MPH: Winds increase the chance of spotting over the heads of firefighters and trapping them between both fire areas. Winds also cause greater preheating of fuels in the path of a fire front.
  - The need to evacuate the public, livestock, pets, and/or animals. This critical activity can pull personnel from the firefighting activity and can distract attention from fire behavior at a time when the greatest alertness is needed.
  - Propane and above ground fuel tanks that are next to wooden structures or close to vegetation
  - Power lines and poles: What is their location in relation to the structures that are being protected? Watch for both overhead and downed power lines.
  - Local citizens are attempting suppression activities. Lack of knowledge in fire suppression may lead to unsafe tactics.
  - Airtanker retardant drops and helicopter bucket operations: Establish communications and keep fire personnel out of the drop zone.
